### Trademarks of Atari

ATARI is a registered trademark of Atari, Inc. The following are trademarks of Atari, Inc: 400, 410, 800, 810, 820, 822, 825, 830, 850, 1200XL.

**Limited Warranty on Media and Hardware Accessories.** Atari, Inc. ("Atari") warrants to the original consumer purchaser that the media on which APX Computer Programs are recorded and any hardware accessories sold by APX shall be free from defects in material or workmanship for a period of thirty (30) days from the date of purchase. If you discover such a defect within the 30-day period, call APX for a return authorization number, and then return the product to APX along with proof of purchase date. We will repair or replace the product at our option. If you ship an APX product for in-warranty service, we suggest you package it securely with the problem indicated in writing and insure it for value, as Atari assumes no liability for loss or damage incurred during shipment.

This warranty shall not apply if the APX product has been damaged by accident, unreasonable use, use with any non-ATARI products, unauthorized service, or by other causes unrelated to defective materials or workmanship.

Any applicable implied warranties, including warranties of merchantability and fitness for a particular purpose, are also limited to thirty (30) days from the date of purchase. Consequential or incidental damages resulting from a breach of any applicable express or implied warranties are hereby excluded.

The provisions of the foregoing warranty are valid in the U.S. only. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. Some states do not allow limitations on how long an implied warranty lasts, and/or do not allow the exclusion of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

**Disclaimer of Warranty on APX Computer Programs.** Most APX Computer Programs have been written by people not employed by Atari. The programs we select for APX offer something of value that we want to make available to ATARI Home Computer owners. In order to economically offer these programs to the widest number of people, APX Computer Programs are not rigorously tested by Atari and are sold on an "as is" basis without warranty of any kind. Any statements concerning the capabilities or utility of APX Computer Programs are not to be construed as express or implied warranties.

Atari shall have no liability or responsibility to the original consumer purchaser or any other person or entity with respect to any claim, loss, liability, or damage caused or alleged to be caused directly or indirectly by APX Computer Programs. This disclaimer includes, but is not limited to, any interruption of services, loss of business or anticipatory profits, and/or incidental or consequential damages resulting from the purchase, use, or operation of APX Computer Programs.

Some states do not allow the limitation or exclusion of implied warranties or of incidental or consequential damages, so the above limitations or exclusions concerning APX Computer Programs may not apply to you.

# Introduction

## OVERVIEW

**PUZZLER** is a game that brings the age-old pastime of jigsaw puzzles to your computer. You don't have to spread the pieces out on your dining room table, but you can work as many as twenty different brightly colored puzzles.

You can choose to see the completed puzzle before you begin, or try to work it from your imagination. When you begin solving the puzzle, you see a grid on the screen with spaces for the puzzle pieces. The pieces are arranged randomly below the grid. Using the joystick, select a puzzle piece and direct it to the place in the grid where it belongs. There's no penalty for making a mistake, but when the picture is complete, the program displays the number of moves you made.

## REQUIRED ACCESSORIES

ATARI BASIC Language Cartridge  
One ATARI Joystick Controller  
ATARI 810 or 1050 Disk Drive  
32K RAM

## CONTACTING THE AUTHOR

Users wishing to contact the author may write to him at:

11 Biron Ave.  
Lewiston, ME 04240

or telephone him at:

(207) 784-5162

## Getting started

### LOADING PUZZLER INTO COMPUTER MEMORY

1. Insert the ATARI BASIC Language Cartridge in the cartridge slot of your computer.
2. Plug your Joystick Controller into the first controller jack of your computer console.
3. Turn on your disk drive.
4. When the BUSY light goes out, open the disk drive door and insert the PUZZLER diskette with the label in the lower right-hand corner nearest to you. Close the door. (Use disk drive one if you have more than one drive.)
5. Turn on your computer and your TV set. The program will load into computer memory and start automatically.

### THE FIRST DISPLAY SCREEN

When the program has loaded into computer memory, the following screen appears:

```

                P u z z l e r
-----
USE JOYSTICK TO SELECT PICTURE
-----
Push Joystick Button when ready

x-FLOWER          -BANANAS
-GATOR            -BURGER
-PHONE           -BALLOONS
-COINS           -TROPIC
-BOY             -GRAPES
-GIRL            -HYDRANT
-FLOPPY          -OCTOPUS
-ABSTRACT        -SPACE
-SHIP            -ELEPHANT
-APPLES         -PIG

```

# Using PUZZLER

## SELECTING A PICTURE

To select a picture, move the joystick to position the asterisk beside the picture you want. Hold the joystick with the red button in the upper left corner. Move the joystick toward the screen to move the asterisk up, and toward you to move the asterisk down. Move the joystick right or left to move the asterisk between the columns.

When you've selected a picture, press the red joystick button.

## PUZZLE PICTURE DISPLAY

You can choose to display the complete picture beside the puzzle grid, or just display the puzzle grid and the pieces, and guess how the completed picture looks.

When you press the red joystick button, a white screen with a colored text window appears. The following prompt appears:

```
Display puzzle picture?  
YES <-> NO  
Push joystick in direction of choice
```

Push the joystick to the left or right to make your choice. Move the joystick to the left (YES) to display the completed puzzle picture along with the pieces.

The screen displays the message "NOW LOADING" and the name of the puzzle picture you've chosen.

## SOLVING THE PUZZLES

The screen now displays a puzzle grid in the upper right corner, either a completed puzzle picture or nothing in the upper left corner (depending on the choice you made), and sixteen puzzle pieces in two rows of eight at the bottom of the screen.

A black bar appears under the top left piece of the two rows of puzzle pieces. Study the puzzle grid and decide which pieces you want to put in which squares. Move the joystick to guide the black bar to the piece you want to put in the puzzle. Press the

red joystick button.

The bar now appears in the puzzle grid in the upper left square. Move the bar to the square you want to put the piece in. Press the red joystick button. If you've chosen the right piece for that square, the piece is drawn on the grid. If you've chosen the wrong piece, a buzzer sounds.

Your black bar returns to the rows of pieces, and you can continue selecting pieces and places until the puzzle is complete.

If you press the START key before you finish solving a puzzle, you return to the main menu.

## SCORING

When you complete the puzzle, the program displays the number of moves you took to complete the puzzle, as follows:

```
          You completed the PUZZLE in  
                    17 moves  
    Press JOYSTICK BUTTON to play again!
```

If you completed the puzzle in only 16 moves, PUZZLER congratulates you for a perfect score.

Scoring isn't cumulative. It starts again each time you select another puzzle.

## RESTARTING THE PROGRAM

At any time during the game, you can restart the program by pressing the START key. You return to the main menu.

The only exception is during the time your score is displayed at the end of a round of play. To restart here you must press the joystick button.

## Review Form

We're interested in your experiences with APX programs and documentation, both favorable and unfavorable. Many of our authors are eager to improve their programs if they know what you want. And, of course, we want to know about any bugs that slipped by us, so that the author can fix them. We also want to

know whether our instructions are meeting your needs. You are our best source for suggesting improvements! Please help us by taking a moment to fill in this review sheet. Fold the sheet in thirds and seal it so that the address on the bottom of the back becomes the envelope front. Thank you for helping us!

1. Name and APX number of program.

Puzzler (230)

2. If you have problems using the program, please describe them here.

3. What do you especially like about this program?

4. What do you think the program's weaknesses are?

5. How can the catalog description be more accurate or comprehensive?

6. On a scale of 1 to 10, 1 being "poor" and 10 being "excellent", please rate the following aspects of this program:

- \_\_\_\_\_ Easy to use
- \_\_\_\_\_ User-oriented (e.g., menus, prompts, clear language)
- \_\_\_\_\_ Enjoyable
- \_\_\_\_\_ Self-instructive
- \_\_\_\_\_ Use (non-game programs)
- \_\_\_\_\_ Imaginative graphics and sound

7. Describe any technical errors you found in the user instructions (please include page numbers).

---

---

---

8. What did you especially like about the user instructions?

---

---

---

9. What revisions or additions would improve these instructions?

---

---

---

10. On a scale of 1 to 10, 1 representing "poor" and 10 representing "excellent", how would you rate the user instructions and why?

---

---

11. Other comments about the program or user instructions:
