

**You
asked
for it...**

We did it

It's a COMPUTER, It's a COLOR TV, It's an ARCADE.

We put it all together just for you!

When you're ready for serious business, power-on to the Master Keyboard. Our state-of-the-art Microprocessor and the RAM packed (64K) internal components (expandable to 128K) turn this system into one of the most powerful computers on the market.

When the business gets tiresome and you want some real excitement, choose one of our 12 action-packed games . . . they'll blow you away. And don't feel sorry if you have a large library of Atari VCS, or ColecoVision games, because you can enjoy them through our expansion modules.

This revolutionary system doesn't just claim to duplicate the arcade experience . . . it surpasses it! And it's portable too, A/C or D/C. Plus 3 dimensional graphics, zoom and other special visual effects. The unique built-in sound system simulates echo and reverberation for authentic reproduction of explosions, crowds, music, etc. And you can hear it all without disturbing others. As a Color TV, it's better than most, with 2 independent systems to guarantee the sharpest resolution for the Computer/Game Systems and TV.

it!

\$999.

ULTRAVISION® VIDEO ARCADE SYSTEM

Entertainment Surpassing... The "Real Arcade Game" Experience

THE ONLY VIDEO GAME SYSTEM THAT IS COMPLETELY SELF-CONTAINED

- Built-in 9" diagonal high resolution color monitor.
- Advanced display technology with detailed graphics and special effects found only in coin-op arcade games.
- Greater brilliance & higher resolution than conventional television systems.

ADVANCED "STATE OF THE ART" ARCADE STYLE SOUND SYSTEM

- Unique sound system incorporates the most advanced electronic circuitry, with musical episodes throughout the game programs creating greater realism and excitement than conventional television sound systems.

COMPLETELY PORTABLE

Operates on AC/DC current with self-contained rechargeable battery power pack & optional cigarette lighter adaptor cord.

EXCLUSIVE FEATURE

- Plays compatible 16K & 32K game cartridges as well as "Advanced" 64K Arcade quality games.

DUAL STEREO HEADPHONE JACKS FOR SILENT BUT DRAMATIC SOUND EFFECTS... (one pair headphones included) **VOLUME CONTROLS FOR DEFINITION & PROJECTION OF SPECIAL SOUND EFFECTS.**

REAL ARCADE STYLE CONTROLS

- Includes 2 high powered, action packed control panels with dual action firing buttons and multiple position airplane style joysticks. Control panels can be used directly against console or from a remote position 4 ft. coiled cord extension.

ADVANCE FEATURES:

- Monitor can be directly connected to computer peripherals. (Apple, Radio Shack, T.I., Etc.)
- Can connect to CCTV Camera to monitor for home security functions.
- Plays the widest selections of compatible game titles than any other video game.
