# Gemulator

## Run Atari ST software on your IBM PC Compatible

Protect your investment with Gemulator Atari ST emulator for the IBM PC compatible

Runs on any 80386 or 80486 based PC with at least 2.5 megabytes of RAM, a VGA card, 3.5 inch floppy drive, and an 8 or 16 bit slot.

Gemulator supports up to 16 megabytes of RAM, 360K, 720K and 1.44M floppy disks, 19.2 kilobaud modems, parallel printers, 640 x 480 and 800 x 600 VGA graphics modes. Sound Blaster compatible sound cards and joysticks, and all versions of TOS from 1.0 to 2.06.

Gemulator is fully compatible with PageStream, Calamus, Calamus SL, MultiTOS, Geneva, Silhouette, Phasar, Straight Fax, LDW Power, Word Up, ST Writer, GFA Basic, Neodesk, Prism Paint, Flash, Tempus, Degas, Word Writer, First Word, Hot Wire, Multi Desk, Maxifile, GDOS, GPLUS, Quick ST, Warp 9, Word Flair, Ez Calc, GEMvelope, Sudden View, Laser C, St Xformer, Magic Sac, Interlink, Avante Vector, Thunder, UISIII, Data Master, Turbo ST, NVDI, Extended Control Panel, Word Flair II, and hundreds of other ST programs and desk accessories. Only software that makes use of the ST built in MIDI ports, copy protected disks, and some timing dependant software (like Spectrum 512) is not supported.

### Here's what our customers have said about Gemulator:-

- \* "This is one terrific package.. Once I set things right, Gemulator works like a champ."
- \* "I was surprised at the speed of Gemulator, on my 486DX33 it is around 3 times as fast as my old 1040STE."
- \* "It took no more than 10 minutes for me to install the board on my first try. Given that I had never opened the case on my IBM compatible before attempting this installation."
- \* "Gemulator allows me to emulate an STE with 5Meg of RAM on my PC, that's 1MEG more than my old MegaSTE."
- \* "I have never seen an Atari ST running in 800 x 600 high resolution, it's just like having an A4 screen on an ST."
- \* "Gemulator has allowed me continued use of my favourite Atari ST software packages, while having access to the new IBM CD ROM multimedia software packages that my family enjoy."
- \* "Marvelous, far better than I had expected, even my son says it's cool."
- \* "It really works."

# Atari ST New Releases

## Geneva

Geneva is a complete multitasking application environment for the Atari ST, STE, TT/030 and Falcon

Geneva gives the GEM environment a complete new 3 dimensional look while giving it powerful capabilities never before possible.

Previously, the Atari was only able to load and run one program at a time, and was only capable of using seven desk accessories. There was no easy way to load or unload different desk accessories, without being forced to restart the computer. Based on the concept of co-operative multitasking that the GEM environment was originally designed on (similar to what Macintosh and Windows are already familiar with), Geneva brings to the user a complete, and easy to use, multitasking environment.

With Geneva, limited only by system memory, the Atari can now load and run any number of GEM programs at once. It can also load and unload any number of desk accessories, without rebooting. Geneva will even allow up to 256 windows to be open at once.

Unlike other Atari multitasking environments, Geneva runs at the full speed of your computer without any significant speed loss. It can also run just about all of your older applications, many of which do not work in other multitasking environments.

Geneva's new look includes 3-dimensional buttons, gadgets, and scroll bars, similar to those found in Microsoft Windows and the Apple Macintosh.

Enhanced capabilities allow one to resize in any direction, not just to the lower right corner, Windows can be manipulated while behind other windows, without having to select them or bring them forward.

Geneva's unique "tear-off" menus place often used drop-down menus into their own window. Geneva includes a powerful Task Manager which allows one to completely

customize all aspects of the environment. Geneva lets you control and select drop-down menus, buttons and dialogs directly from the keyboard.

---

## F1

F1 is the official Formula One Racing Game. It is also the fastest, most authentic, most thrilling race game yet. Battle it out on the real Formula One Circuits against the real teams and the real drivers of the FIA Formula One World Championship.

Are you ready to race around the real circuits and against the actual drivers and the teams of the FIA Formula 1 World Championship? You will need to combine split second timing, lightning reactions and the ability to get the best out of your car to be able to compete and challenge for victory.

All the colour, drama, thrills and speed of the Formula One circus have been included to make F1 the most breathtaking game you have ever played. From the FIA Championships season where speed and consistency will bring you victory, to the amazing 'simultaneous split-screen' option where you can race head to head against a friend, F1, the most technically advanced sport in the world has been captured in the most technically advanced racing game ever available on your computer.

---

---

## Cannon Fodder

Cannon Fodder caused outrage in the United Kingdom and inspired Parliament to demand that it be banned, and in general created another call for a review of entertainment software standards.

You must go into battle with the enemy. You are the commanding officer. Do you have what it takes to keep your men from being turned into cannon fodder?

Don't wait until you see the whites of their eyes..  
Don't kid yourself it will be over by Christmas..  
Don't try to shut out the screams..  
Cannon Fodder, the hottest selling piece of entertainment software on the market.

War has never been so much fun.

---

---

## Internet For Dummies.

The fun and easy way to learn the Internet.

Your First Aid Kit for popular Services & Commands on the Internet. What to do when bad things happen - explained in plain English.

The Internet is the fastest growing source of information and services for millions of computer users. For novice users unsure of how to take advantage of the world's biggest computer network. The Internet for Dummies provides a vital reference that will enable you to swap e-mail, conversation, software, and more across the globe. This book's friendly approach will help timid Internet users cut through the networking jargon and quickly get the best resources the Internet has to offer.

---

## ExtenDOS

If you would like to join the CD-ROM revolution ExtenDOS could be your way of doing that.

ExtenDOS allows you to access any ISO9660 or High Sierra format CD-ROM as if it were a removable hard disk. You can switch between supported disk formats without a reboot, access files of any size.

ExtenDOS CD Extensions requires a SCSI CD-ROM drive connected to a SCSI port directly, or to a SCSI port via an ICD AdSCSI or equivalent host adaptor.

## Art For Kids

A new Australian ST paint program for kids.

Written by  
Tony Barker of  
Moving Pixels

Reviewed by  
Peter Fez  
for  
The Paragon Report

Having lived in Australia for just over twenty years now, I consider myself almost an 'Aussie' so I try to buy Australian products where ever I can.

So when Phil Reeves of Paragon Computers showed me a new Australian software package "Art for Kids" written for the STe/Falcon and asked if I could get my kids to give a test run what could I say ?? only YES.

The first thing you notice is the packaging, if the rest of the product is as good, we are on to a good thing here..... Simple, colourful and clever, a strong corrugated cardboard box with a built in handle. The contents, a disc and a well written manual...

A quick read of the manual reveals the system requirements of an STe or better, colour monitor (TV) with a minimum of 512K of memory. Art for Kids, can also be installed on a hard drive (recommended).

O.K. so you want to know about the software not the box ! As the name implies Art for Kids is a drawing package, aimed at

children but is a drawing package with a difference. The difference is sound which spells fun. All functions have a sound attached, like using the pencil, which produces a scraping noise not unlike chalk on a blackboard that makes your hair stand on edge. Or when the 'fill' is used a sound of running water. The quality of the sounds are excellent and are obviously digitized.

ART for Kids (AFK from now on) has been written with fun in mind. it's not a fully featured art package, with multi colour pallets, high power zoom, cut and paste and edit tools, there is already plenty of those on the market. However AFK has features that are fun and is easy to use.

Like some drawing programmes it has an icon driven tool box, this runs across the top of the screen and includes the usual lines, boxes, circles, pencils, brushes, fills and undo. Across the bottom of the screen, a sub set of icons which relate to the selected tool from the above tool box, like line thickness and fill style.

AFK also has a 16 colour pallet selector (ST version) down the left hand side of the drawing screen and file function icons (save,load quit and clear screen) down the right hand side. A well thought out feature of the file functions, is that the icons can only be used in conjunction with the control key, avoiding accidental use. There are no 'GEM' drop down menus, all the functions are selected via the above icons.

Unlike other packages AFK has a rubber stamp tool with four rows of colourful stamps ranging from flowers to boats to pink pigs. One of two other function found in AFK I have not come across on any other ST art package before is the blender. the blender is a selection of tools that modify the picture drawn on the screen in many different ways, like swapping the colours over or overlaying it with patterns.

The other function is screen cleanser, this is not just a clear screen button (like clear screen icon in the file functions), it is tool that when selected, lets you clear the screen in such novel ways via a sub set of icons, that it's as much fun to dispose of your picture as it is to draw it....like a bomb that blows up your picture.

Having "played" with this great piece of software for a couple of hours, the real test came when I passed it on to my two girls (aged 12 and 15) and left them to it. Within minutes I could hear 'woos' 'aarrs' and giggles along with lots of weird noises. Three hours later when dinner time rolled around they were having as much FUN with AFK as when they first got their hands on it.

I don't know if it is the excellent icon driven interface, the selection of different tools, the associated sounds, or all of the above that make AFK such a winner, I know of one sale already.

Art For Kids only \$59.95

## IBM and Atari ST Compatible Computer only \$2295 inc. monitor

Run all IBM software and most of your Atari ST software on the one machine

- 486SX33
- 4 Meg RAM
- Intel CPU
- VESA Local bus slots
- 210Mb Hard Drive
- 1.44 Mb 3.5" Floppy Drive
- DOS 6.21
- Windows 3.11
- 101 keyboard
- Mouse and mouse pad
- Games port
- Serial port
- Parallel port
- SVGA 14" non-interlaced .28 dot pitch monitor
- Gemulator ST board including ROMS
- Mini tower or Desk case
- SVGA 1 Mb Video card with feature connector
- ZIF Socketed processor for ungradeability

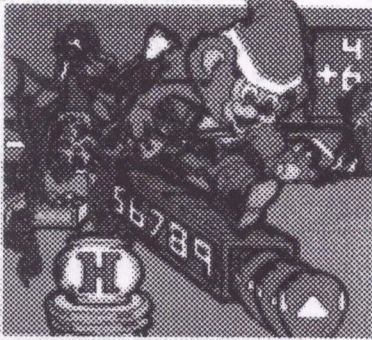

# Atari ST \$9.95 Software Specials

BENTLEY BEAR

ATARI ST

An introduction to the concept of identifying the possible combinations of numbers to yield a given solution.

## Bentley Bear Educational packages

**Magical Math 1 \$9.95**  
An introduction to basic mathematical functions of addition, subtraction, multiplication and division with a mix of mathematical problems.

**Magical Math 2 \$9.95**  
An introduction to the concept of determining the possible combination of numbers to yield a given solution.

**Magical Math 3 \$9.95**  
Introduces the basic mathematical functions of addition, subtraction, multiplication and division of fractions.

**Memory Master 1 \$9.95**  
This strengthens a young students memory skills by improving concentration and associating the alphabet with pictures.

**Memory Master 2 \$9.95**  
This further develops the memory skills introduced in Memory Master 1

**Magical Anagrams \$9.95**  
This introduces the concept of anagrams and teaches spelling and problem solving in a game playing environment.

**Spelling Bee \$9.95**  
This teaches spelling via the deductive process and promotes the understanding of vowels and consonants and their use in context.

**Alphabet Tutor \$9.95**  
This can be used as a child's introduction to the alphabet. Colourful graphics are used to instill an association with consonants and vowels.

## Family Curriculum

### Play and Learn Module.

Save \$20.00  
Normally \$29.95  
Now only \$9.95

Includes 3 of the Prof series of educational software packages.  
Prof plays a new game.  
Prof looks at words.  
Prof makes sentences.

**Prof plays a new game.**  
Part one teaches a sight vocabulary. The words are chosen from the Murray and McNally word list. They are words the child is familiar with and are used in reading books suitable for beginner reading. The games on the disk correspond with the reading books, giving every book its own game.

**Prof looks at words.**  
Part two teaches children how to look at words more closely and so distinguish similar looking words from each other as well as helping with spelling.

**Prof makes sentences.**  
Part three gives your child a gentle start to writing and so become efficient in sentence sequencing. It also offers a simple way to introduce the keyboard.

## First Word

Word Processor  
only \$9.95

First Word makes wordprocessing tasks from writing one paragraph to multi-page reports faster and easier. It is particularly useful when you need to move blocks of text within a file, or copy them into two or more different documents.

While easy to learn and use, First Word still provides the word processing power and versatility experienced users expect. The program takes full advantage of the ST's GEM desktop including windows, icon and drop down menus and includes a comprehensive 74 page instruction manual

## Family Curriculum

### Creative Computing Module.

Save \$20.00  
Normally \$29.95  
Now only \$9.95

includes:-  
Hyperpaint II.  
Music Maker II.  
First Basic

**Hyperpaint II** supports a wide range of picture formats and provides an ideal environment for editing and retouching large scanned images suitable for use with desktop publishing software. Image sizes ranging from 32K Neochrome and Degas files to multi megabyte scanned images can be edited with ease.

**Music Maker II** is the complete package for the beginner to computer music, it has three main sections. The composer allows you to write music directly to the computer screen and play it back through the ST's hardware. MIDI recorder records everything you play on a MIDI instrument connected to the built-in MIDI ports, allowing you to replay a song and edit it on screen. The drum pattern allows you to design and edit a drum beat using a number of different percussion samples. This can then be implemented into a composition written directly onto the staves.

**First Basic** is a powerful and modern version of the BASIC language that gives you a totally integrated and interactive environment for the production of your programs.

## The Atari Compendium

Save \$30.00  
was \$119.00  
now only 89.00

Provides the most comprehensive collection of information designed for every level of Atari programmer. This guide contains an explanation and detailed reference for every function present in TOS versions 1.0 through to 4.0. In addition, you will find coverage of some of the exciting new features present in TOS 5.0 and beyond.

Some highlights of topics covered

- \* GEMDOS/MiNT processes
- \* MiNTinterprocess communication
- \* BIOS/XBIOS/GEMDOS Vectors
- \* Falcon030 Video/Sound Control
- \* Utilizing math coprocessors
- \* Resources (including new TOS 4.0 resources)
- \* Extensive user interface guidelines
- \* The most complete memory map ever published
- \* A complete "graphic" catalog of Speedo characters
- \* File formats (.GEM, .IMG (including colour), .FNT, .RSC)
- \* The TOS file system \* Networking \* The Cookie Jar
- \* The DSP \* The IKBD Controller
- \* Window iconification \* VDI Workstations
- \* SpeedoGDOS \* Desktop extensibility
- \* Game controllers

## Tempus 2 Editor

Save \$59.00  
was \$119.00  
Now only \$59.95

If you are looking for a powerful, general-purpose editor for your ST, waste no more time. Tempus 2 is the one you've been searching for. Tempus saves you time and effort; now you can edit quickly, efficiently and easily with the most advanced editor available.

key feature include:-

- \* Fast, efficient and totally configurable.
- \* Complete range of editing functions plus macros.
- \* Optional word wrap with justification.
- \* Launch other programs from within the editor.
- \* Multiple search and replace with wild cards.
- \* Undoable undu, auto file save, auto screen off
- \* Sort function, cross reference, structure check.
- \* Complete keyboard shortcuts even for dialog boxes

## TruePaint Painting package

Save \$30.00  
was \$119.00  
Now Only \$89.00

TruePaint by HiSoft is a paint package for the 90's. With the combination of its easy-to-use paint commands, its ability to run in any resolution (from monochrome to True colour), its flexible animation features and the sheer number of image file formats that it supports, TruePaint is a must for any user of an Atari ST, TT, or Falcon030 computer.

All TruePaint's tools and options are accessed through the toolbox or through the various menu choices, with a wide range of keyboard shortcuts for those who prefer not to use the mouse for such things.

MiGraph ColourBurst Colour Hand Scanner

At last a colour hand scanner for the Atari Falcon computer that's fast, accurate and affordable. With the MiGraph ColourBurst you can now produce crisp, clear, vivid colour images, for all your multimedia projects, on screen presentations, and desktop publications. And have a lot of fun doing it.

A three in one scanning solution. Versatility is the ColourBurst's specialty. If the image you are after is smaller than a full page, whether it's a photo, illustration, drawing or cartoon (or business card, postcard, Christmas card, or photo identity card) you can scan it with the MiGraph Colourburst.

It's a colour scanner when you need eye catching colour graphics. A grey scale scanner when you need full size true 64 level greyscale images for hassle free,

high resolution printouts. And it's a monochrome scanner when you need crisp, clear scans of line art or text for OCR processing

No-nonsense software.

The ColourBurst comes with Colourkit, easy to use imaging software for accurate, efficient scanning. It picks up 262,144 brilliant colours in a single pass. The same software lets you quickly and easily save your image in a variety of standard file formats, ready for direct export to video, graphics and publishing applications.

The ColourBurst's large scanning window, more than four inches wide, provides fast, single-

pass scanning. Six scanning resolutions from 50 to 400 dots per inch let you scan images at the resolution best suited to your chosen output device. Five scanning modes give you the flexibility to work with colour, grayscale and black and white images, all with one scanner, so you can produce exactly the image you need for the output option of your choice, on screen display, laser and Linotronic printouts, overhead transparencies or slides. With the MiGraph ColourBurst capturing high resolution colour (and grayscale and monochrome) images has never been easier, or more fun.

**Features.**  
Speed.  
Fast single-pass scanning.

**Size.**  
Half-page scanning window 4.13 inches wide.

Five scanning modes.  
Super colour (18bit), colour

(12bit), grayscale, dithered halftone (colour), and line art (monochrome).

Adjustable resolution.  
Six settings from 50 to 400 dpi.

Grayscale scanning  
True 64-level grayscale scans at 400 dpi.

Monochrome scanning.  
Scan line art for graphics projects or text for OCR processing.

Colourkit software  
Quick, accurate scanning and easy saving for direct export.

Versatile file formats.  
Save scans in a variety of standard file formats.

Compact design.  
Comes complete with parallel interface and cable for easy installation.

Options.  
MiGraph OCR Jr  
Scan documents and turn them into editable text files with MiGraph OCR Jr which has these powerful features. Omnifont-based. Trainable (pretrained on 20 typefaces). User defined character libraries. Lexicons for higher accuracy
