## Outgoing Mail

Perhaps the greatest reward for an editor is the association with readers and authors, whether it's a chance meeting, a telephone call, or through the mail. SoftSide is more than a few pages with ink printed on them. It's an association of readers, programmers and staff, exploring the frontiers of a revolution - the rise of personal computing and the power of information-handling; and all of us with computers are manning the barricades.

There's the joy of discovery as new ways are found to release the power of personal computers. There's the joy of sharing a newly-learned technique with friends, and there's the joy of an exciting new game or release from drudgery made possible by a program that retypes our letters or keeps our financial records in order.

SoftSide looks upon its readers as partners in this enterprise. We're even willing to share the profits with you! All you have to do to claim a share is send in your programs and articles. We need good programming and because we're associated with PROG/80, BIZ-80 and the TRS-80 Software Exchange, we can use all kinds of programs - either to publish as magazine articles or offer as machine-readable software on tape or disk.

We want to share other good things with you. That's why we do our best to offer you supplies like diskettes and software like FORTRAN at excellent prices. We're committed to providing a wide variety of top quality debugged software through the TRS-80 Software Exchange.

We need your help to make these things happen. One thing we want to do is increase our circulation. We're committed to quality - in fact, we insure it by paying well
for articles and programs we publish. You've probably seen the same authors' names in issue after issue. That's largely because they know we pay faster (and better) than even the large computer publications. Do your part to increase our circulation. Tell your friends about SoftSide. Talk to your local computer store and encourage them to carry it. Write to us; tell us what we're doing right and (shudder) what we've done wrong. Tell us what you want to see in SoftSide and in our other publications. By all means, continue to send us good programs. There's a very heavy demand for major simulation games such as End Zone, Santa Paravia, Clipper and Safari (coming in next month's issue). We've received a lot of mail telling us that you prefer these simulation games to war games. We also receive mail from people who enjoy the war games, so we'll continue to offer the best ones, but there is a special need for major simulations. Also, we want good practical programs like Checkbook and Form 1040.

Only you can make SoftSide the leading software supplier for TRS-80. That's what we intend to be. We're determined to offer more and better free-for-transcription programs than anyone else. We'll continue to emphasize the Level II TRS-80. We're convinced that anyone buying a new Level II computer or upgrading a Level I will find no better publication to meet their needs. At the same time, we're committed to offering limited support to Level I owners as well as to owners of the other computers which use Microsoft BASIC. The main difficulty with transferring programs from one brand of computer to another is in converting graphics routines. For this reason, we encourage programmers to put graphics in clearly separated subroutines with adequate remark statements, and explain what the graphics do in their accompanying articles. We'll try to do our part by providing good pictures of graphics displays for you to work from. (If you've converted some of our programs to a different computer, write and tell us about it. We want to hear from you.)

Until next month, when we shall go on Safari together, keep pounding those keys!

Electronic Assistant by John Adamson A group of 8 subprograms designed to solve problems such as tuned circuits and active and passive filters.

# Shrouded in mysticism and legend, Tarot cards are ancient forerunners of modern-day playing cards. Although their beauty and significance have evolved over centuries of interpretation and meditation, their symbolic references to astrology, myths, magic and religion remain relevant and fascinating, even in this age of computer technology. 

by Frank B. Rowlett, Jr.

The Tarot program uses the Egyptian Tarot Card deck and the five card "Yes or No" spread. The Tarot deck consists of 78 cards - 22 Major Arcana cards, 16 Court Arcana cards, and 40 Minor Arcana cards. The Court Arcana and Minor Arcana cards are divided into four suits: Scepters, Cups, Swords, and Coins. There are four ranks in the Court Arcans cards: King, Queen, Youth, and Horseman. The Minor Arcana cards are numbered from one to ten in each suit.

The computer first asks you to enter a question that can be answered by yes or no. Once you have done so, the computer deals out five cards from right to left.

The first two cards indicate th past as it relates to the question. Th center, or key, card indicates thi present, and the last two cards - thi leftmost two cards - indicate thi future.

The answer to your question $\mathbf{i}$ then determined by whether thi cards are dealt right side up o upside down. A bar appears at th bottom of each card (unless the cari is upside down; then the bar looks a if it is on the top of the card.) A cart right side up indicates a 'yes' response; upside down, it indicates : "no". The center or key card count twice. When all five cards have bee1 dealt, the yeses and noes are tallied Whichever there is more of deter

## TRS-80 PROGRAMMING HINT

If you find you're writing subroutines for line printer reports, you may find this information useful: memory location 14312 (decimal) holds the line printer status. A value of 255 indicates the line printer is OFF. A value of 233 indicates it's ON, but unavailable for use. Finally, a
value of $\mathbf{6 3}$ is status READY TO print. To prevent getting hung up because the line printer isn't connected (or whatever), use this before commanding the program to 'LPRINT':
$1000 \mathrm{C}=\mathrm{PEEK}(14312)$ 1010 IF C < > 63 RETURN
(DON'T LPRINT)

## by Laneo Micktus

## Turn Your TRS-80 Into A Computer Terminal

Radio Shack gives you a TERM program with its RS-232-C board, but that's just to whet your appetite. ST80 was written by the author of Renumber 1.2, so you know what kind of features to expect: CONTROL key, ESC key, REPEAT key, a RUN key, and a functioning BREAK key. Also lets you list incoming data on your lineprinter. You can reprogram the RS-232-C switches from the keyboard, making baud rate changes simple. Full upper/lower case keyboard and video driver are included, plus instructions on how to make a simple hardware modification to display upper/lower case letters (This change is optional. Unmodified TRS-80 will display capital (upper case) letters only.). Supplied on tape, loads with SYSTEM command. Disk users can also load and run the program under DOS.

Requires at least 16 K Level II BASIC, a RS-232-C serial board, and a modem to work with a timesharing computer. The cursor control format includes clear screen, backspace, advance, down and up space, clear to end of line or frame, and home, using the most common control character format currently in use (similar to CDC terminals).

Level II, 16K Price, S49.95 on tape

# Miles pounds $\quad{ }^{k_{1 L_{0}}} O_{G_{R_{A M S}}}$ OUNCES Celsius METRIC rods imers ENGLISH CONVETER 

by Dr. Stephen W. Hebbler

A few years back, Congress authorized the gradual conversion of theAmerican unit of measure from the archaic (though time-honored) ENGLISH system-pounds, feet, gallons-to the more uniform and interrelated universal METRIC system.

Here's a program designed to take some of the ache out of the changeover:

## INFORMATION WANTED

Anyone with information or suggestions regarding a successful interface of IBM keypunch 026 or 029 with TRS-80, please contact:

> GEORGE AHIMUTY WENDY LANE WESTPORT, CONNECTICUT

Telephone: 203-227-8534

## REVISION

Simple SiMON, originally slated to run in SoftSide this month, will appear in the premier issue of our new publication PROG/80. All SoftSide subscribers will receive a complimentary copy of the first issue - watch your mail this month for PROG/80.

## Z80 HANDBOOK <br> by Nat Wadsworth <br> YOUR COMPLETE REFERENCE TO THE Z8O INSTRUCTION SET!

Explains the capabilities of the set of the Z80 CPU in easily understood terms. Serves as a practical handbook reference to the industry standard mnemonics, machine code and usage for each type of instruction provided in the Z80 CPU. A practical guide for novice, intermediate, or professional programmer working at machine or assembler language level.

## BIZ-80 is Here

It costs $\$ 100$ for the documentation, an additional $\$ 50$ for the software on magnetic tape, and an additional $\$ 100$ for the software on diskette. We highly recommend that you subscribe on one form of media.

In adopting this approach, we're going straight for the jugular (so to speak).

We anticipate a very competitive market for business software relating to the TRS-80 within the next year, and wish to establish ourselves immediately in a dominant position. In doing so, we are presuming over 1,000 participants in the BIZ-80 project. Pricing accordingly, we truly feel BIZ-80 will become such a fantastic bargain that few serious businessmen who intend to use a TRS-80 within their enterprise could possible pass up the value offered. Really ... how could you pass this up?

We're sure you must be interested in just what you'll be getting.
Well, just about everything you need! Within the year, (and probably within six months) you'll receive a disk-based Inventory system - Accounts Receivable system - Accounts Payable system - General Ledger system - Sales - and Payroll. At the same time, all six subjects will be covered for a tape-based system. Yes! Provisions have been made so that as your system upgrades, your data base will follow with minimum difficulty.

We're not talking about stripped-down systems.
Elements of BIZ-80 are already prepared and have been sold to SATISFIED customers for as much as $\$ 150$. The Name/Address system requires an entire diskette itself (over 50,000 bytes) with some optional subroutines relegated to yet another disk.
Our magazine, SoftSide, has proven it can be done. Significant software can be offered at extraordinary prices, attracting a sufficient following to make the effort profitable.

BIZ-80 is not only competitive, but will, in fact set the standard by which value will be compared. And that standard will be hard to meet. That's the pitch - believe it - it's true!

## RADIO SHACK TRS-80 SUPPORTED

Using the Radio Shack TRS-80 as our base, we provide a full line of business-oriented software on subscription, plus products with the follow-on support necessary to insure successful installation and ongoing operation

## The object of BIZ-80 is to develop systems which

1. Are easy to use, well-documented and include simple error-correction routines
2. Will be extremely inexpensive and cost no more than other specialized subscribed-to services
3. Can be used by the customer without the need to have sophisticated computer-oriented personnel
4. Existing personnel and management can easily learn to operate

## The Systems

1. Are professional quality products developed for the businessman utilizing a TRS-80 microcomputer system
2. Work all the time
3. Are well-documented from the customer's point of view
4. All tie together - Order Processing feeds Accounts Receivable, etc.
Our goal is to ultimately provide the complete computer system with:
*Basic business programs on subscription basis
*Special application business programs on contractual basis
Our software products are oriented to four levels of TRS-80's:
SYSTEM - S
A stand-alone 16 K Level II with one cassette tape
SYSTEM - 1
A 32 K Level II with DOS, optional printer (CRT oriented)
and one disk drive
SYSTEM - II
A 32 K with DOS, line printer and two disk drives
SYSTEM - III
A 48 K with DOS, line printer, RS232 interface and $3+$ disk drives Programs and systems are only as good as the documentation and people behind them.

Rerun, operation and backup procedures, as well as start-up and first time run instructions are covered in detail from the perspective of the first time computer user. Easily followéd step-by-step instructions guide the user through a sample run using dummy data provided with every system. User can start running the system right away, without the need to stumble through it trying to create a file in order to figure out how to use it. Documentation continues to be improved as we hear from customer/users. From time to time we upgrade the documentation to reflect improvements and changes in the system caused by TRS-80 enhancements. To insure you will be informed, every purchaser is urged to register in our mailing system; we will notify those purchasers of any changes.

Participants in the one-year (maximum) contract will receive:
-12 Systems - 6 tape and 6 disk $\bullet$ Support - Updates •A Monthly newsletter

Two systems are provided immediately, with an additional system supplied once per quarter for a year. This approach allows you to become competent with your systems in an organized and orderly way. The conversion from a manual system to a computer-based system is no easier on a microcomputer than on a macro or a big computer. Principal participants in BIZ-80 have been involved in many business conversions. By subscribing to BIZ-80, you subscribe to our software, our support, our updates, our knowhow!

## OUR SOFTWARE...

By the end of the year, you will have 6 systems up and running. You can choose your first two systems from: Accounts/Receivable, Name and Address, or Inventory. These are good systems to start your business microcomputer experience with. The other four systems will be sent out quarterly. You can choose from our other software products - the list of these applications is expanding monthly. All 6 systems will cost less as a package than if purchased as stand alone systems. (Also, you can purchase other business software - add-on modules - at reduced prices. Remember: all these business systems tie together. They are add-on modules developed to complement one another; the building blocks of your complete business microcomputer system.

## OUR SUPPORT...

You can call us during normal working hours ( 9 to 5 , till 9 pm on Wednesdays, EST) with any problems you may have. If we don't have an immediate answer, we'll research the problem and get back to you within a few days. This hot line service insures that you'll have technical assistance - on line - as you work with your

TRS-80. We'll address your concerns, talk about hardware and software problems, discuss fixes. BIZ-80 principals have had many years experience in the business computer environment as programmers, hardware technical support personnel, software support personnel and data processing managers. We have a professional team, a professional product and a professional attitude. The TRS-80 is a powerful tool for business management. We want to help you use this tool to your best advantage.

## OUR UPDATES...

Updates to the system occur through enhancments we find are useful to the user. They can also occur through user-requests and (not unheard of) by the discovery of bugs in the systems. These enhancements will be available at a nominal charge to cover distribution expenses. Updates are FREE to BIZ-80 subscribers.

## OUR NEWSLETTER..

A newsletter will be distributed monthly. We'll be sending you copy concerning:
-Concerns raised by Hot Line callers •Hints and helpful tidbits about using the systems and using the TRS-80 $\bullet$ Editorials on sophisticated use of these systems •News announcements of new software and hardware from us and Radio Shack •Ads for products applicable to the TRS-80 business user $\bullet$ Your evaluations of our products (hopeully, with your participation)

## SIDELIGHTS

We would like it understood from the outset that while BIZ-80 will deliver a core system for an extremely reasonable price, we'll also be selling other pieces of software for general sale. Usually, BIZ-80 participants will be given a discount. In any event, by today's standard, tremendous value will be given to the participants.
It may seem early to crown ourselves the leaders in business software for the TRS-80, however, we see no true competitors with both the warewithall and the confidence to do what we're doing. The whole approach is revolutionary.
We can say without shame that we expect to profit by our relationship with you just as you will from us. We'll do custom applications at reasonable prices, modifying the core programs to suit specific needs', and use the result as another profit center either as an increment to BIZ-80 or for general sale. When the day comes that we see the first ads offering BIZ-80 software compatibles appear in the industry magazines, we'll know that we've reached our goal - to become the standard!

## Can You See <br> Through This?

by Rev. George Blank

If you're interested in writing, this article and program are for you. Whether it's a computer program, an article, the great American novel, or a letter to your son in college, the important thing is that you be understood.

Many of us have come to understand that when government employees have nothing to do, they take out their rage upon the public by writing regulations that are impossible to understand. This little program will tell just how hard they are to understand.

If you want your article to be accepted for this magazine, a careful use of this program will increase your chances. The program is a Fog Index. If you are a sailor, you know that fog is a nasty concotion that obscures rocks, icebergs, othet ships, and various other nasties that you would prefer to see before you feel them. ln writing, fog is just as nasty, for it makes it impossible to understand what is written.

The Fog Index gives the approximate reading level by school grade. As written, the program averages the reading level of five sentences to
give a score to the material. This can be used in two ways:

## The General Test

Choose a typical section of a book, article, or letter, and count the number of words and number of words over two syllables in five consecutive sentences. This gives an overall score for the article.

## The Acid Test

Choose the five most difficult sentences of the material. Enter the number of words and number of three syllable and larger words in the computer. This test tells how hard it
is to completely understand the material. The acid test is more important for government regulations, for a small misunderstanding can get you into big trouble.

What do you do with it? If you are writing, you should try to keep your fog index well below the level of the average reader, but high enough so that the material is not boring. Perhaps the most difficult of the popular magazines, the Atlantic Monthly, is written at a twelfth grade level. For this magazine, with young readers learning to program, a fog index of 8 is appropriate. (Lest you think that writing on the eighth grade level is demeaning, the Revised Standard Version of the Bible presents the Sermon on the Mount at the eighth grade level.)

One interesting fact that $I$ discovered using the program is that the instructions for the low income credit on the Federal Income Tax are written for people with Master's Degrees. It's consoling to know that Uncle Sam shows compassion to Doctors, Lawyers, and graduate Engineers who earn less than $\$ 8,000.00$ a year and support a family!

## DIVE BOMR!

by Rev. George Blank

## Dear Gabby;

You've got to help me! My girlfriend wants to play games on a computer, but I can only afford 1076 bytes of memory for my TRS-80. Please write quickly, the new guy on the block just bought CODE NAME SECTOR!

## Lovelorn

Dear Lovelorn;
Have no fear. Just eliminate the remarks and instructions from lines 5 and 10 of DIVEBOMB and you can sink your rival. If you girlfriend is the intellectual type, let her sit on the left so that she has three controls to operate. Pressing the letter $\mathbf{Z}$ will make the planedive, $\mathbf{A}$ will cause it to level off, and when she's low enough, $X$ will drop the bomb. You can press the / key to fire your anti-aircraft gun, but it's a surplus model from the last war and jams after the third shot. Don't let your lovelife go down in flames!

Gabby Van Dusen

## Part One-CHECKBOOK

## PERSONAI

by Lance

Personal Finance consists of two programs: the tirst is Checktoon which will maintain your checking account. The second program, Checkilinder, maintains a file of all your cancelled checks and will be featured in part two of this serles.

Before you can use either of the programs, you must set up your budget names. It's important to carefully consider which categories you want to use for classification. Thls will vary from one person to the next according to individual needs. Include accounts for any specific expenses you want records of, especially those needed for income tax purposes, lie, alimony, child care, etc. You should also leave a few sccounts unclassified for future use. Once you have Identitied the budget names, you must eller ine DATA staternents at the and ot the program to reflect
your own requirements. You must also change over the name and address DATA statement to your own from mine. Don't exceed 10 characters, or displays may not work.

Checkbook is set up to handle 33 account names. It's very important that the last one remain CHECK TO CASH. This account name is set up for checks made out to cash and allows for future upward expansion of the personal finance package.

The program maintains a file of all checks written but not cancelled and returned from the bank. The file is read from tape at the beginning of the program and saved on tape at the end. When checks are returned from the bank you should run the program and cancel those checks out of the file.

# FINANCE 

## e Micklus

The cancelled checks are written out to a scratch tape called CANCELLED CHECKS, prior to deletion from memory. Don't remove the tape until the computer prompts you to do so. In addition to maintaining an outstanding check file and check balance, Checkbook will also justify your account against the bank statement, and when it's time to pay the bills, you can use a bill estimating feature to see how much (if anything!) you'll have left after all the bills have been paid.

Checkbook makes use of dual cassette machines. It also contains a small program which generates test data in place of real checks. I recommend that you toy with the program using the test data until you feel comfortable, then begin using real data.

Good procedures dictate that you test this program very carefully. Human engineering will help you to catch human error: where possible, keyboard entry is kept to a minimum. Also, the program is set up so you can jump back and forth from one function to another. If you discover an error while cancelling a check out of memory after it's returned from the bank, you can correct the error and then cancel the check.

We cannot assume any responsibility for consequences resulting from the use of this program. However, I will say this: 1 have used this program to maintain my personal checking account for several months and have found it valuable in managing my family finances. I'm certain you will find it of assistance in your own home.

## TRS-80 PROGRAMMING HINT

Some problem tapes can load quite easily by applying pressure to either front corner of the cassette. The apparent problem is a mismatch between the originating recording device and the receiving device. Applying pressure alters the physical position of the tape so the PLAYING recorder gets a cleaner, crisper signal. In order to decide which corner to press, simply listen to the recording. The crisper, the better - try one corner, then the other.

At last - a program for the person who's always going to pieces!
If getting yourself together seems to be something you never quite accomplish, now you can practice on a puzzle that has fewer pieces than the average person has problems. Exercise your problem-solving abilities and get yourself ready for the big challengers such as what to do when the TRS-80 club meeting, big football game and your wife's class reunion all occur at the same time.

The pieces can be rotated to fit in upside down or sideways, and if you guess at any square that the piece will cover, your guess is correct. The computer will pick the puzzle - you must guess it. When playing in a group, each member can take certain pieces so that you've got a guessing strategy for each piece. Or, compete to assemble the puzzle in the fewest tries. Here's how you can score yourself:
5-7 Genius-President Carter needs you to figure out inflation
8-10 Expert-You could get away with dating four people at one time
11-15 Good-Able to chew gum, walk, and think simultaneously
16-20 Fair-Must chew, walk or think, one thing at a time
Over 21 Try Again-After all, even Einstein didn't talk until he was 3!
$\square$

## Softide Presents: <br> A Page from The BASIC Handbook by David A. Lien

The ASC function converts a character or string variable to ASCII integer code.

For example, PRINT ASC ('A') prints 65, the ASCII code for the letter A. PRINT ASC(AS) prints the ASCII code of the first character in string variable $A \$$.

## TEST PROGRAM

1f REM 'ASC(CHARACTER)' TEST PROGRAM
2Ф PRINT "THE ASCIICODE FOR LETTER A IS':
3• PRINT ASC ("A*)
4) IF ASC('"A'')=65 THEN 7

5 PRINT "ASC FAILED THE TEST"
6) GOTO 99

71 PRINT "ASC PASSED THE TEST"
99 END
SAMPLE RUN

THE ASCII CODE FOR LETTER A IS 65 ASC PASSED THE TEST

The next program tests the ASC function with a variable.
TEST PROGRAM

```
1/ REM 'ASC(STRING VARIABLE)' TEST PROGRAM
2% PRINT "TYPE ANY LETTER, NUMEER,OR CHARACTER"';
3|INPUT AS
44 PRINT "THE ASCIICODEFOR ";AS:" IS";ASC(AS)
99 END
```

## SAMPLE RUN (using $H$ )

```
TYPE ANY LETTER, NUMBER, ORCHARACTERT H
```

THE ASCIICODE FOR H IS 72

Some computers which incorporate the ASC function can accept character strings longer than one character, but only the first character is evaluated and converted to ASC.II code. To test for the ASC string limit, use the second Test Program and INPUT progressively longer strings until an error message appears.

## VARIATIONS IN USAGE

Some interpreters (e.g. MAXBASIC) use the format $\triangle \mathrm{SC}(\mathrm{A} \$, \mathrm{X})$ which prints the ASCII code of the first X characters contained in $\mathrm{A} \$$.

## ALSO SEE

CHR\$, Appendix A for the ASCII code.

## PROGRAMMERS:

It's no secret that software for the newer, smaller, less expensive microcomputers is the fastest growing field in personal computing today.
With TRS-80 Software Exchange, you have your choice of one-time publication rights in SoftSide magazine, listing in the Market Basket Catalog, or just letting us sell your software. In any case, you retain the rights to the programs you worked so hard to produce. We list programs for everyone: where else can you find a program that will lay out the flight plan for pilots of smatl aircraft as well as one that will read Tarot cards, in one handy, easy-to-use catatog?
If you decide you'd like us to market your soltware, please write or give us a call. We realize we couldn't possibly have answered all your questions in this space, but we hope we've sparked your interest.
For more details, write:

## TRS-80 Software Exchange

Software Edifor 17 Briar Cliff Dr. Milferd, NH OBP55

## Shipping

All software is sent via first class mail or UPS, depending on quantity ordered. Complete documentation is included with your order. All software prices are postage paid - accessories and books are not included in this category - postage for those items sthould be added to your check when your order.
All software is guaranteed to foad and run. If you experience any difficulties, simply return the tape or diskette for free replacement.
We duplicate 90 percent ot our software on the premises. We ship all orders with 48 hours of receipt. Unusually heavy demands may cause a program to be temporarily out of stock. In that event, we ship a partial order and rush you the balance as soon as humanly possible.

Thanks!

## (G)

TROLL'S GOLD by Rev. George Blank
A chase game for children of all ages. The troll is deep within the caves, guarding his gold. Your aim is to descend to his lair and escape with the booty without him capturing you. For Level II, 16K

Price, $\$ 4.95$
MASTERMIND II [Version 2.1] By Lance Micklus
Many TRS-80 programs have been written to play digital Mastermind. But they would only let the computer make the codes, and the human break the codes. Our version of the classic game lets you and the computer take turns making and breaking codes so you can both play. This program is a beautiful example of the speed of the $Z-80 \mathrm{cpu}$. The computer takes less than 3 seconds to make a guess, and will usually figure out a code on the 5th guess. It's uncanny! The secret is that it is written in machine language, not BASIC. We supply you with an object tape which loads in addresses 7600 to 7 FF0 using the SYSTEM command. It is also DOS compatible. Thus, the object code may be stored on disk using TAPEDISK and executed under DOS from disk. If you like to play challenging games of logic, we strongly recommend this one.

Price, $\$ 7.95$
Source Listing
Price, $\$ 20.00$
TIME BOMB by David Bolke
Somewhere inside a towering skyscraper, a time bomb is ticking away. Your mission: locate the explosive device in this maze-like structure and disarm it within a given time.

Level I or II, 16K Price,\$4.95

## 3-D TIC TAC TOE by Scott Adams

Everyone knows this game, but how about a $4 \times 4 \times 4$ version? Three skill levels for computer competition - author warns you to practice before tackling the computer's third skill level. Level I and II, 16 K Price, $\$ 7.95$
GAME OF LIFE by Small System Software
A game of birth, growth and death of a colony of cells. Enter any pattern (4 furnished) with unique repeating keyboard, then save on tape. A fast, machine language program (about 1 second per generation).

Price, \$14.95

STAR TREK III by Lance Micklus
One of the most advanced Star Trek type games ever written. Object of the game is to explore as much of the galaxy as possible, destroy the 20 Ktingons and locate the 5 Class M planets. Exploration facet of the game gives it a whole new dimension. Extensive use of graphics, including a 3-dimensional galaxy. During a Klingon battle you see the phasers fire, hit the Klingons and explode. Hazards to be aware of are large stars, black holes and a pulsar. Pulsar makes space noise in adjacent quarters where the Klingons are hidden. Docking must be controlled to avoid collision or docking failure. At game's end you return to Star Fleet Headquarters where collected data is evaluated by your ship's computer and your performance is rated. Takes about 2 hours to play a game. Level II, 16 K

Price $\$ \$ 4.95$
X-WING FIGHTER by Rev. George Blank
Looking for more realism in Trek-type programming? Put yourself in the cockpit of this fighter. Extensive use of the INKEY function puts all of the ship's controls at your fingertips without hitting the ENTER key. Long range sensors warn of approaching aircraft prior to visual contact. After sighting, their size increases with proximily. Level II, 16K

Price,\$7.95
AIR RAID: by Small System Software
High speed machine language program with large and small aircraft flying at different altitudes. Ground-based missile launcher airmed and fired from keyboard. Planes explode when hit, sometimes cause damage to nearby aircraft. Score tallied for hits or misses, then saved for challenge by another player.
Level Ior II, 4K
Price, $\$ 14.95$

## PILLBDX by Gene Perkins

A simulated artiliery battle between two fixed emplacements. A two-player game, each person controls the angle of fire and muzzie velocity of the sheli. The game places a mountain between the warring batteries and lets the laws of physics take over.

For Level I and Level II, 4K
Price,\$4.95

## TEN PIN by Frank Rowlette

High speed graphics superbly presented in this simulation of the great indoor sport. A game of coordination, the scoring is friue to the rules of the sport. Computer keeps score for one or two players. Records spares, strikes, splits, open frames.

For Level II, 16K Price, $\$ 7.95$
END ZONE by Roger W. Robitaille, Sr.
Authentic football simulation, right down to the 2 -minute warning. Played in four 15-minute quarters. Levef I or $11,16 \mathrm{~K}$

Price, $\$ 7.95$
ZONE HOCKEY by Michael Flanagan
A very interesting game with a graphics orientation. Designed for two players, the offensive player attempts to maneuver into zones close to the goal for a shot, while the defensive player attempts to anticipate those maneuvers. Scorekeeping and periods accounted for according to number of keyboard plays entered.

Levell, 4K Price, $\$ 4.95$
SLALOM by Denslo Hamlin
A real time action program. Choose between the Slalom, Giant Slalom and downhill courses. Be fast - but don't get hurt - or worse . . . . Level II, 16K Price, $\$ 7.95$

## 'ROUND THE HORN by Rev. George Blank

You are the captain of a sailing ship racing from New York to San Francisco. You must attempt to tind favorabie winds and currents which will provide the most expeditious route around South America through the Straits of Magellan. Superb graphics!

ROBOT by Lance Micklus
Struggle to keep your wits about you as an army of robots stalk you through a seemingly endless maze. It's you against them as you simultaneously seek to avoid and trick them into their trap.

## AOVENTURE by Scott Adams

$$
\text { Level II, 4K Price, } \$ 4.95
$$

You'll feel as if you're manipulating HAL, the infamous computer from the movie 2001: A Space Odyssey when you play this game. Hardly any rules, finding out is part of the game - or is it a game. Two adventure situations - pirate and land on one diskette.

For Disk Only 32 K — $\$ 24.95$
TREASURE HUNT by Lance Micklus
Explore caves in search of 20 treasures. Some are easy to get, others very difficult because you have to figure out how. The more you play, the more secrets you discover, the more treasure you will find. All 20 treasures can be found in about an hour of play if you know what you're doing. First problem: draw a map of the caves. To save you time, however, a map is enclosed. Good luck, you'll need it. Level I or II, 16 K Price, $\$ 7.95$

CONCENTRATION by Lance Micklus
In the 1960's, one of the most popular TV game shows in history appeared on the air. "Win campers or boxes of nails, gifts galore, but take the chance of forfeiting them later in the game". Most of all, concentrate on where the items are on the play board.

Level I or II, 16K Price, $\$ 4.95$

## ESP TESTEA by Frank Rowlett

Remember those crazy ink blots and funny patterns? Well, here's your chance to test your mind-reading capabilities by psyching out your computer's brain. TRS-80 picks a pattern, you read it's mind. Very appealing graphics. Level I or II, 4 K Price, $\$ 4.95$

SINK'UM BY Rev. George Blank
Fire! Sorry, Captain, the tubes are still being reloaded ... and so it goes in this arcade level action simulation. To be successful takes careful planning and a keen sense of timing. What about those torpedoes? Well, you'll see! Level II, 4K Price, \$4.95
PORK BARREL by Rev. George Blank
Put yourself in the shoes of an aspiring Congressman. Given a breakdown of your constituency by percentages: white collar, retired, farm worker, unemployed, welfare, blue collar, eiderly and many more, how would you vote on various sensitive issues? in this game, you get to put your vote where your mouth is. Don't worry, the voters in your district will let you know how they fee!! Level II, 16K

Price, $\$ 9.95$

## KENTUCKY DERBY

Place your bets and urge your favorite horse on to thrilling victory in this exciting race program.

Level 1 or II, 4K Price, $\$ 4.95$

## BREAKAWAY by Lance Micklus

A chaltenging real time action game of skill and dexterity. All the excitement of a traditional pinball machine without the added expense. You control speed and direction of the ball as you try to "break away" the playing field. Level 1 or $11,4 \mathrm{~K}$ Price, $\$ 4.95$

## SANTA PARAVIA EN FIUMACCIO by Rev. George Blank

Capsule simulation of economic life in a 15 th century Italian city-state. Object of the game is to build your feudal holdings into a kingdom, progressing upwards to higher levels of nobility, ultimately to reach coronation before death. Four levels of difficulty Apprentice, Journeyman, Master, Grand Master. Level II, 16K Price, $\$ 7.95$
THIS PROGRAM WILL ONLY BE AVAILABLE UNTIL MARCH 31, 1979. Reg. $\mathbf{5 9 . 9 5}$

CHECKERS by Don Mc Allister
All you need to have an ever-ready checkers opponent is a Level I machine with 4 K of memory. A surprisingly fast and competitive program written in BASIC. For Level I, 4 K systems

Price, $\$ 4.95$
CRIBBAGE by Roger W. Robitaille, Sr.
A "you versus the computer" cribbage, played by the standard rules. Computer shuffles, deals, keeps score and wins ... unless you're careftur. Feature in October SoftSide.

Level I or II, 16K Price,\$7.95

## BRIDGE CHALLENGER by George Duisman

You and the dummy play 4-person Contract Bridge against the computer. The program will deal hands at random or according to your criterion for high card points. You can review tricks, swap sides or replay hands when the cards are known.

## SARGON by Dan \& Kathe Spracklen

Level II, 16K Price, $\$ 14.95$
The recent winner of the 1978 San Jose Microcomputer Chess Tournament, SARGON, Kathe and Dan Spracklen's revolutionary chess-playing program, left spectators slackjawed as it soundly defeated a formidable field of chatlengers.

Level fl, 16K Price, $\$ 19.95$
SARGON: A COMPUTER CHESS PROGRAM by Dan \& Kathe Spracklen
Complete documentation covering all algorithms in SARGON (above) is found in this guide book. Contains a complete table of contents, biock diagram of the program, a 4-part introduction, $\mathrm{Z}-80$ listing and index to subroutines. Fully annotated. Price, $\$ 14.95$
MICROCHESS by Peter Jennings
The culmination of two years of chessplaying program develepment by Peter Jennings, author of the famous 1 K byte chess program for the KIM-1. MICROCHESS 1.5, in 2-80 machine language, offers 3 levels of play (both Level I and Level II versions are included and can be loaded on any TRS-80 without TBUG.) Every move checked for legality and current position displayed on a graphic chessboard. You can play White or Black, set up and play from special board positions, or even watch the computer play against itself!

Level for II, 4K Price, $\$ 19.95$
CHESS COMPANION by M. Kelleher
Combines chess clock features with the ability to record your moves while the action is fast and furious. The moves listing may be reviewed at any time.

Level II, 16K Price, $\$ 7.95$
BACKGAMMON by Scott Adams
A completely different program which is just waiting to beat you! And it plays a pretty mean game. Level II, 16 K . Price, $\$ 7.95$

## Businers

INVENTORY MANAGEMENT FP by M. Kelleher
Handles up to 100 stock items with primary and backup vendor. Allows for stock on order and date of last shipment received information. All information, including character strings, is contained in subscripts and thus recordable separately from the program. Two programs are included on one cassette (Initialization and Maintenance) If your inventory exceeds 100 stock items, it should be a simple matter to segregate stock into logical subdivisions with separate data files. Level II, 16 K

Price, $\$ 25.00$
MAIL LIST I by Michaet Kelleher
The economy model of disk-based mailing list computer programs. Requires only 16 K with a single drive - handles up to 1400 names per disk plus provisions made for some sorting options.

For Disk Dnly, 16K Price, $\$ 19.95$

## DISK SOFTWARE FOR TRS-80 LEVEL II

DISK PAYROLL

Written to be a useful tool for the individual who has joined the growing number of men and women using microcomputers in their business to save time and increase accuracy in record keeping. Even if you have never seen a computer before, you can run DISK PAYROLL. The programs included on the diskette are interactive, that is, they ask questions in English and expect you to type answers on the keyboard. All data files are handled on your diskette automatically - no cassette tapes are necessary.
A comprehensive 24 -page manual with step-by-step instructions on how to run each program is included in the package. Quarterly summaries as well as payroll information can be printed on line printer. Programs supplied on a high quality $51 / 4$ inch diskette.

Price, \$59.95

## INVENTORY SYSTEM 2.2

This program allows for the creation, maintenance and review of over 2000 inventory items per clean diskette. The system is designed to operate under Radio Shack BASIC, DOS2.1, with a minimum memory allocation of 16K RAM. Data maintained for each inventory item includes: description (up to 15-character length in any combination of alphanumerics or punctuation), vendor name of code (any 8-character alphanumeric or punctuation combination), quantity of inventory item on hand, cost per unit, retail price per unit, reorder point, quantity sold, quantity purchased.
Inventory System 2.2 is based upon the utilization of "random files' ' with 6 sub-records per random file buffer. This method of data storage allows for maximum utilization of diskette space and is briefly discussed in the Radio Shack DOS 2.0 Users Manual. It is assumed the user is familiar with the TRS-80 operation methods as well as Radio Shack Disk BASIC and DOS 2.1. If you need information in depth, consider Inventory 2.0 as an alternative.

Price, $\$ 59.95$

## INVENTORY SYSTEM 2.0

Inventory System 2.0 is based on Radio Shack Disk BASIC and DOS 2.1, utilizing a random file data storage method. It offers comprehensive inventory control of up to 340 separate items per clean diskette. Any number of disk drives may be utilized. It is assumed the user is familiar with the basic operation of the TRS-80 disk BASIC and the DOS operating system 2.1. Provides for file names, item description, new data entry, adjusted inventory, ledger maintainence, delete/review, management reports: review of selected items without maintenance routines, complete cost analysis of all items, alert for minimum levels. Each program is designed to be as self-prompting as possible for ease in operation. Sample date file included to enable user to familiarize himself with the system through manipulation of the posting, maintenance and reporting functions until prepared to utilize them.

Price, $\$ 39.95$

## ACCOUNTS RECEIVABLE 2.0

Designed for use by any small to medium volume business operation requiring sophisticated control of accounts receivable. This particular system is based upon Radio Shack Disk BASIC and the companion disk operating system known as (DOS 2.1). Notes included in the package convey all necessary instructions to implement the accounts receivable system 2.0 successfully, however, it is impossible to discuss many facets of operation relative to the TRS-80 computer itself. It is, therefore, assumed that the user is familiar with both the TRS-80 Level II Reference Manual and the TRSDOS 2.0/2.1 instruction manuals which accompany TRS-80 equipment.

Price, $\$ 59.95$

## DISK PROGRAMS ON THESE PAGES MAY BE ORDERED DIRECTLY FROM

## TRS-80 Softwore Exchnn9e

17 Briar Cliff Drive Milford, New Hampshire 03055

INVENTORY [MODULAR] by Roger W. Robitaille, St.
Construction of this program permits the user to create subroutines customized to his own purpose. Allows for the inclusion of Alphabetic information and a Data Index Code in the form of data statements within the program. Performance and flexibility unmatched by our other inventory software. Detailed Report, Reports, Cost/Value Summary, Reorder Search, Index, Read and Write File, Data Change.

Version I 240 stock items can be contained using the full 8 data areas and 2 pieces of alpha information

Level I or II, 16K Price, $\$ 20.00$

## INVENTORY 2.2

A level II diskette-based program which allows for creation, maintenance and review of over 2,000 items per clean diskette. Operates under Radio Shack Disk BASIC, DOS 2.1 with minimum memory allocation of 16 K RAM. Utilizes random files with 6 subrecords per random file buffer, allowing for maximum utilization of diskette space.

For Disk Only
Price, \$59.95

## INVENTORY 2.0

A random file method of data storage designed for comprehensive inventory control of up to 340 separate items per clean diskette. Any number of disk drives may be utilized with this system.

For Disk Only
Price, $\$ 39.95$
ACCOUNTS RECEIVABLE by M.D. Kelleher
Allows for the creation of up to 200 files with account name, invoice number, payment date and balance. Updates files and stores to tape. Offers complete aging data and reveals delinquent accounts. Level II, 16 K

Price, $\$ 25.00$

## ACCOUNTS RECEIVABLE by Michael Kelleher

For any small to medium volume business operation requiring sophisticated control of accounts receivable. Based on Radio Shack BASIC for diskette operation DOS 2.1. Utilizes a random file method of data management. Maintains up to 329 separate ledgers on each clean disk. Optimum system has been designed to operate with two disk drives, however the system has been designed to operate with a single drive also.

For Disk Only
Price, $\$ 59.95$

## PAYROLL by Stephen Hebbler

Even if you have never seen a computer before, you can run DISK PAYROLL. The programs included on the diskette are interactive - they ask you questions in English and expect you to type your answers on the keyboard. All data files are handied on disk automatically and no cassette tapes are necessary. Comprehensive 24 -page manual with step-by-step instructions included in the package.

## For Disk Only

Price, $\$ 59.95$
SMALL BUSINESS BOOKKEEPING by Roger W. Robitaille, Sr.
National Distributing Co. has been selling the Dome Bookkeeping Journal for scores of years through stationery and discount stores. This program is compatible with that journal. As is appropriate with any business application, we assume no liability in regards to the use of this progam. The user is expected to assess it based upon its performance as observed. It's not that we don't believe in it, it's just that the conceivable liability for its use (or misuse) is so staggering you just plain use it at your own risk, or don't use it at all. Available with or without Dome Bookkeeping Journal. Level I or II, 4K

With Journal - Price, $\$ 22.00$
Without Journal - Price, $\$ 15.00$

FILE HANDLING by Circle Enterprises
A must for file handling in BASIC. Will list names in file, search/edit file, record file on cassette. One use would be to record names and phone numbers, either one callable by the other. Level II, 16 K

Price, $\$ 9.95$

## APPOINTMENT LOG by M: Kelleher

Perfect for the professional. Accepts name and address information, meeting start and endings and subject matter, and derives elapsed time - reports of course. Level II, 16K Price, $\$ 9.95$
MOVING SIGNBOARD by Circle Enterprises
A machine language program designed to use the TRS-80 as a display device. User may type in up to a full screen of text, store it in memory and then cause it to crawl across the screen in the fashion of an electronic marquee. Level I or II, 4 K

Price, $\$ 9.95$
CASH REGISTER by Roger W. Robitaille, Sr.
If you've considered adding a small computer to your business, whether for inventory management, business accounting or any of the hundreds of other useful applications, here's one more reason to do it today. This program has 12 customizable departments, can store up to 300 sale events by department and amount, shows a dally sales report and performs a cash-out routine. It can even be used with a screen printer to furnish receipts. Level I or II, 4K

Price, $\$ 10.00$

## PREFLIGHT by Stephen Hebbler

A program for use by private pilots - aids in routine checks, fuel consumption prediction, flight plan plotting, determines ETA according to departure time and destination.

HAM PADIO by Michael Kelleher
Level II, 16K Price, $\$ 20.00$
If you're an amateur radio buff, this powerful program can put a lot more fun into your nobby. A few of the features: Amateur Frequency Allocations, ID Timer, 0 -Signal Fite, Propagation Forecasting, Amateur Log Routine (stores to tape $\log$ of station activity by Callsign, Date, RST, Mode, QTH and other information; permits review of previously recorded log tapes.

Level II, 16K Price, $\$ 9.95$

## EDUCATOR ASSISTANT Dy Steve Reisser

Five programs of value to educators. Compute percentage, individual student averages, class averages, standard test scores, final grades. Usable from elementary to post-doctoral levels. Level II, 16K Price, $\$ 9.95$ Disk Version, \$14.95
KEYBOARD 80 by John Adamson
Plays music on your TRS-80 keyboard. A machine language program which loads with SYSTEM command. Three-octave diatonic scale organ lets you play many of your favorite songs right on the computer's keyboard! Simply load program and plug the
"AUX' line into any audio amplitier and play. Level II, 16 K Price, $\$ 9.95$

All Level II software is available on disk for a $\mathbf{\$ 5 . 0 0}$ [per order] medium charge. Heck! if your order exceeds the capacity of a single disk, we'll kick in the extra.
Please state Level and Mermory when ordering. Unless specified otherwise, we will automatically ship Level II software.

MACHINE LANGUAGE MONITOR - 16K Advanced by Small System Software
Twenty-two commands interact directly with Z-80 processor. Examine ROM's, test RAM, enter and execute machine language programs, read and write SYSTEM tapes, enter Z-80 BREAKPOINTS. SYMBOLIC DUMP disassembles object code and displays as Zilog standard mnemonics. Memory may be displayed in HEX or two ASCII formats and can be EDITED, MOVED, EXCHANGED, VERIFIED, FILLED, ZEROED, TESTED, or SEARCHED for one or two-byte codes. Continuous or one-line at a time memory dumps.

Level I or II, 16K Price, \$26.95
3 MONITORS FOR DISK SYSTEMS by Small System Software
Contains 3 versions on a single disk to load into 16 K through 48 K TRS-80's with disk systems. Read your TRSDOS into memory using DISK read command, print disassemble listings with SYMBOLIC dump and printer output command, then modify and rewrite to disk using DISK write command.

Price, $\$ 29.95$
MICRO TEXT EDITOR by Don Coons
Versatility in text composition and editing through use of a non-destructible cursor, graphics capability and interface option with cassette tape or either TRS-80 printer. Commands include: Delete, Insert, ASCII Code, Repeat, Print, Save, Load, Clear, End. Level II, 4 K or 16 K

Price, $\$ 9.95$
8080-Z80 CONVERSION by M. Kelleher
What can we say! For you machine language buffs, here is a program which permits you to enter 8080 codings and the program will return the Z -80 equivalent. It will also store these equivalents in the order in which they were entered, for later review. For Level II, 16K

Price, $\$ 15.00$

## BASIC STATISTICS by Steve Reisser

This powerful set of procedures is of use to students, instructors, behavioral and research scientists, statisticians - anyone using rand. order, central tendency, Pearson product-movement correlation coefficient, chi-square, Fisher T-test, sample analysis of variance, Z -scores and standard scores, with a random number generator built in to simulate data. Level II, 16K

Price, $\$ 20.00$
RENUMBER by Lance Mickius
This program can renumber a 12 K program in just 32 seconds. Complete user control with respect to which lines are renumbered, and how, including all GOSUB's and GOTO's. Runs in 1300 bytes of high memory regardless of program size. Specify 4, 16, 32 , or 48 K version when ordering. For Level II Price, $\$ 15.00$
Source Listing All 4 versions on DISK Price, $\$ 20.00$ Price, $\$ 25.00$

## Perronal

## HOME FINANCIAL MANAGEMENT by M.D. Kelleher

Turns your computer into a personal financial advisor. Easy to use, yet complete enough to be of real use. Features include: Loan payment amount, savings balance, dividends and withdrawals, earned interest rate, true cost of automobile, budget, cost of borrowing, balance of loans still owing, probability of obtaining a loan, plus more! For Level II, 16K

Price, $\$ 9.95$

PERSONAL FINANCE by Lance Micklus
This is a 2 program package. Checkbook is used to maintain your checking account and Checkfinder maintainsa fiie of all your cancelled checks. Thirty-three different budgets can be set up to assign each check to. The budget names are in DATA statements at the end of both programs so they may be easily changed by the user to fit his individual needs.
Checkbook includes a test data generator which may be used to demonstrate the program, or to make test runs on the program without the need to use real checks. The menu format makes it easy to change functions, and the program is human engineered to require the least number of keyboard actions. The design of the program is such that human erfor is minimized. Besides maintaining a balance, the program will justify your account against the bank's monthiy statements. There's even a bill estimator to help you decide who gets paid this month.
Checkfinder gets the cancelled checks from a data tape generated by the Checkbook program, and builds a cancelled checks fite. It will locate canceiled checks for you and total the amount of all checks found. So, if one of your budgets was alimony, it will locate every alimony check that came back from the bank. Really impresses the IRS. A modified bubble sort will rearrange the file in memory and save it on tape. Checkfinder will store 900 checks in memory on a 16 K machine. We assume no liabilities regarding the use of these programs.

Level II, 16K Price, $\$ 9.95$
Special Price, \$7.95
MICRO TAX 78 by George Clisham
Just in time to hetp you prepare your 1978 Federal Tax Return. Includes 6 programs to aid in optimizing your ' 78 return. Completes form 1040 along with schedules A, B, C, D, and SE . With full user instructions.

Level II 16K Price, $\$ 12.95$

MICRO TAX 78 MINI PAC by George Clisham
The same program as above, but only completes Form 1040 and Schedule A. Makes short work of long forms.

Level II 16K Price, $\$ 7.95$

CALCULATOR by Roger W. Robitaille, Sr.
Allows the TRS-80 to function as a calculator with one key function codes and the ability to carry totals. The four basic arithmetic functions are included along with the reciprocal, memory storage and retrieval, and reverse sign. Level I or II, 4K Price, $\$ 2.95$

BIORHYTHMS by Frank B. Rowlett, Jr.
There is a theory that everyone is subject to a group of life cycles which affect their daily lives. The rates of the cycles are mathematically fixed, and lend themselves to computer analysis. This program unravels those interrelated formulae into a meaningful graphic representation for you to interpret. Runs in Level I or II, 4K

Price, \$4.95
TAROT by Frank B. Rowlett, Jr.
Probably the best future-gazine type program ever. Unlike many programs whose appeal wears out quickly, the combination of graphics and presentation leads to continuing use. Try it - you'll like It! Level I or II, 16K

Price, $\$ 9.95$

## 'ROUND THE HORN

## WEATHER BULLETIN

Latest information received from Central Weather Service informs us of the following necessary modification to line 7540 in 'Round the Horn:
$7540 \mathrm{~W}(3,2)=\mathrm{RND}(3)-1: \operatorname{IF} \mathrm{W}(3,1)) 29$ THEN $\mathrm{W}(3,2)=-\mathrm{W}(3,2)$
We hope the change improves your voyage!
