ATARI VERSION OF THE CCA DATA MANAGEMENT SYSTEM

The ATARI version of the CCA DATA MANAGEMENT SYSTEM is a menu driven, easy to use, but powerful information filing, and organization software system.

GENERAL SYSTEM SPECIFICATIONS

- * Uses separate DATA and Program disks for maximum storage.
- * Works with one or two disk drives on the computer.
- * May be used with RAMCRAM pseudo-disk memory card.
- * NOT COPY-GUARDED, so you may make back-up copies.
- * NO Lockout keys required with the program for use.
- * Stores a full 90,000 characters of info per DATA disk.
- * Record length may be up to 249 characters.
- * A field within the record may be up to 110 characters.
- * Up to 24 fields per record may be used.
- * Data dictionary used to hold applications and reports.
- * Records are not wiped out with the Delete function in case of non-intentional operator errors.

MAIN MENU

- * A function is selected from the main menu.
- * Choose END, MAINTENANCE, COMPACT, PRINT, DEFINE, SORT.
- * Automatic Error trapping is used.

DEFINE FUNCTION

- * This section is used to teach CCA DMS your application.
- * Alpha-numeric, Numeric only, or Permanent fields supported
- * Computed fields to allow Addition, Subtraction, Multiply, Divide, or exponentiation of fields, through the use of math formulas is supported.
- * Typically you can perform a definition in a few minutes.

MAINTENANCE FUNCTION

- * This section allows you to work with your information. It uses your prompts for ease of use.
- * Perform ADD, UPDATE, INSPECT, DELETE, SCAN, CHECKPOINT, EXIT functions.
- * If computed fields were defined they are automatically computed whenever an ADD or UPDATE occur.
- * DELETE only flags a record for removal. You may reclaim the record with the UPDATE function.
- * Smooth straight-forward random access to your records.
- * Scan will find either Full or Partial embeded keys fast.

PRINTING REPORTS

- * This section allows the printout of your information to either a printer or your tv screen.
- * The information is printed in columns of your choice. You specify WHAT will be printed and where.
- * The commands supported are: PFILE, FFILE, TITLE, ROUTE, LENGTH, DEPTH, XFILE, FORCE, TYPE, and REC#.
- * The column controls supported are: TOTAL, SUBTOTAL, EDIT, and TAB.
- * Partial or Full Files may be printed.
- * Supports REPORT or LABEL formats.
- * Once a report is successfully printed you may save the report or label format. Then it may be used later.
- * A very flexible report writer.

COMPACT FUNCTION

- * This section is used to remove flagged records (DELETED) and pack the file (Free disk space).
- * Also may be used to back-up a copy of your files.

SORT FUNCTION

- * This section is used to alphabetize the order of named items or to order numbers.
- * Uses the advanced concept of a WORK disk, a DATA disk, and an OUTPUT disk. MAY be used with a SINGLE drive computer system.
- * Multiple sorts are possible up to 10 levels with the selection of ASCENDING or DESCENDING on EACH level.
- * The system will inform you of each of its operations as they occur. You are never left in the dark.

To date hundreds of this system have been sold. This is a can do software package as our users keep track of everything from comic books to replacement human body parts. We were the first data management system for personel computers (1978) and also the first to have our system for the ATARI Personel Computer. The system is presently in it's second release as we constantly are looking for ways to improve this product. There will be future updates to users who register the system with us. A substantial discount will be offered to upgrade your CCA DMS when the next release is offered. Now is the time to begin to get organized with the CCA DATA MANAGEMENT SYSTEM. Only \$99.50 and available at hundreds of dealers worldwide. If your dealer does not carry our system yet, have him call or write us. Or you may contact us directly if you so choose.
