

FANCY WRITER

A Data Based Font Writer for the Atari®

Fancy Writer® is a unique program which permits printing of five different fonts (supplied with the program) on your Prowriter®, NEC®, C.Itoh®, Epson®, Gemini®, AT/GX100® and Gorilla Banana® dot printer. Fancy Writer® will print five sizes on the Prowriter®, NEC®, and C. Itoh®; two sizes on the Epson®, Gemini®; one size on the AT/GX100® and Gorilla®. Fonts available are Old English, Cursive writing, Countdown, Futura and Babyteeth.

- ★ Easy to use . . . Menu driven.
- ★ Not a dump or downloader.
- ★ Fonts were custom made by a professional artist especially for computer printing.
- ★ Print from disk file.
- ★ File text on disk.
- ★ Direct keyboard entry.
- ★ Great for newsletters, correspondence, letterheads.

HUMPTY DUMP

Put Your Art in Print

Humpty Dump® is a RAM resident screen dump for Graphics modes 0 (yes! zero!), 7, 7+, 8, 9, 10 and 11. Once booted into your Atari 400/800® it is always ready to dump your computer art or mode 0 listings to a Prowriter®, NEC®, C.Itoh®, Epson®, or Gemini® graphics printer. It will even dump a screen while a BASIC program is running!!! Humpty Dump® works with either the BASIC or ASSEMBLER/EDITOR cartridges. Now you can show Aunt Sara your Art without hauling your equipment over to her house!!

\$34.95

Humpty Dump® not available for AT/GX100® or Gorilla®.

AT LAST!

BEARTRAP

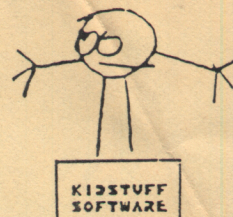

PRINT YOUR KOALA PICTURES

Beartrap® is a new translator utility from Kidstuff Software which converts Koala® picture files to raw screen files for loading and dumping with programs on Kidstuff's famous HUMPTY DUMP®!! Koala® files are left unharmed because BEARTRAP® places the converted files on a separate disk under the filename of your choice. Just think! You can now combine the best of two worlds, Koala Pad®, the most exciting peripheral on the market today, and HUMPTY DUMP®, the famous RAM resident screen dumper from Kidstuff Software.
