DUPLICATING TECHNOLOGIES, INC.

Fall '85

We are proud to announce the merger of Gardner Computing with Duplicating Technologies Inc., designed to bring you the very best in Atari hardware and software products. We are also very pleased to introduce the "DUPLICATOR" for the 1050 and the old reliable 810 disk drives. The enclosed description of the "DUPLICATOR" will fill you in on all the exciting details.

Since you have either been a past customer of Gardner Computing or you have expressed an interest in some of their products, you will have the opportunity to purchase a "DUPLICATOR" before its formal introduction in trade magazines this fall. We expect the demand for the 1050 Duplicator to be quite heavy but if you order now there will be no wait. The Duplicator for the 1050 and 810 is here...it's in stock...and it's waiting to be shipped directly to you.

Please examine our company brochure which is enclosed. You will find that it includes some of the newest and most innovative products ever offered for the Atari Computer. And as a special introductory offer you will be entitled to a 10% discount on all merchandise including The New "DUPLICATOR."

At Duplicating Technologies, Inc., we believe that all Atari users should be able to back up their software collections. We're constantly working on new, innovative products to make this possible. All of our products have been tested and re-tested and are quite compatible with the XL and the new XE series.

We look forward to hearing from you soon.

Sincerely,

The Staff at Duplicating Technologies, Inc.

New Products Are Being Developed Continuously

THE PIRATES' TREASURE CHEST

on disk

18 Utility Programs on one disk.

All for the unbelievable low price of
only

\$39.⁹⁵
+ 2.50 shipping

These programs are designed to aid you in **copying software** for your backup collection. You will be able to copy **disks, cartridges** and **cassettes**. Any one program is worth the price of all 18. It has taken us over one year to put together this fine collection on the **Pirates' Treasure Chest** disk.

Some of the programs you will receive are:

- CARTRIDGE COPY
- BOOTAPE MAKER
- TAPE TO DISK
- SECTORCOPY
- THE UNPROTECTOR
- SECTOR DISASSEMBLER
- BAD SECTOR FINDER
- MODEM PROGRAM

**PLUS
MORE**

All of these programs plus 10 more on this disk. You will also receive a **menu** that will run basic and binary files just by typing the number of the program. Any file on any disk will load automatically from this menu.

These programs are extremely user friendly
SPECIAL!!!

We have now included in this package a 26 page manual on how to unprotect disks or crack codes. With this instruction manual and these utilities to aid you

You will be able to make back up copies of heavily copyguarded disks and cartridges.

Also see our brochure on Duplitech's new 1050 & 810 Duplicator, which is better than the overpriced and complicated Happy Enhancement.™

MODEM PROGRAMS

835 & 1030 Modem Downloader

This software will give you access to thousands of free games on bulletin boards throughout the country.

PROBLEM: With the 835 & 1030 Atari modems you can't download files or data. You can't even have your disk drive on.

ANSWER: With our software you will be able to download or save files to your disk drive or cassette player.

You will be able to download basic or binary games from bulletin boards or send and receive games to a friend or distant modem. You will be able to save games taken by phone easily onto disk or tape. Text files can be saved to your printer.

This software is very user friendly and works on all Atari home computers. No translator disk needed with the new XL computers, No Interface Needed. When ordering, specify tape or disk.

All for the
LOW LOW price of ONLY **\$34.⁹⁵**
+ 2.50 shipping

Modem Downloader for 850 Interface Based Modems

Most features of the Downloader included in this program. It also works on any modem that must use the Atari 850 interface. Works on 300 or 1200 baud.

Example: Hayes or Signal etc.

All for the
LOW LOW price of ONLY **\$34.⁹⁵**
+ 2.50 shipping

(Specify type of modem when ordering)

This program is only used with 850 interface or a compatible interface!!

Some of the DOWNLOADER'S Features are:

- send or receive a binary file of Unlimited Length
- send or secure whole disks
- works in Ascii and Atascii translation mode
- link with CompuServe or The Source
- format disk feature
- auto answer
- full and half duplex toggle and many more
- data base for storing autodial phone numbers
- auto redial if number is busy

THE TRANSFER PACK

POWERFUL AND INEXPENSIVE COPY POWER

Back up and transfer your cassette boot tapes and disk files.

You will get three programs on disk and one program on tape plus our universal menu.

All for the LOW PRICE of

~~**\$34.**~~⁹⁵

1. TAPE TO TAPE

2. BOOT TAPE TO DISK FILE

3. DISK FILE TO BOOT TAPE

4. THE UNIVERSAL MENU

User Friendly Software and instructions and documentation on how tapes or copyguarded; all of this is what we call our Transfer Pack.

1. TAPE TO TAPE

This program comes on a cassette. It will enable you to make copies of Boot Tape and Basic Tapes. You do not need a disk drive. Source tapes are read from the source tape into the computer then copied back to a blank destination tape. You will be able to copy 95% of all boot tapes **even copyguarded multi-staged tapes such as Zaxxon**. Even four staged multi copy-guarded tapes have been successfully copied with our program.

2. SINGLE STAGE BOOT TAPE TO DISK FILE

This program will copy and transfer tapes to disk in file format. Put 6 or more tapes on one disk. You may use our menu to run these files. Transfer your entire tape collection on to several disks.

3. BINARY FILE TO BOOT TAPE

Powerful machine language program will transfer 95% of all disk files to tape. This program is ideally suited for people with large disk file collections that would like to share with a friend who only has a cassette player. Files such as *PacMan* can easily be transferred to tape.

4. THE UNIVERSAL MENU SCOPE

A small file which when placed on a DOS disk will auto boot and list all the games files on that disk. To run a file all you do is pick a number next to the game you wish to play and the game will load and execute. This program is ideally suited for organizing your games onto disk.

The Transfer Pack took us six months to develop and write. We are proud of this software package and feel it will solve any tape copy problems you might have.

The Transfer Pack comes with a lifetime guarantee on the disk and tape media for the original purchase.

WRIGHT-RIGHT 810 & 1050

For the 810 and new 1050 disk drives. Write to side "2" of any disk. No need to notch those holes or remove write protector tabs ever again. Side "2" of any disk can be used the same as side "1". The WRIGHT-RIGHT is fully assembled and tested. No need to drill or cut. Just attach this attractive small box to your disk drive. Easily applied with double sided tape to the outside of your drive. Only ONE wire to plug in your disk drive. Five minute installation. Only tool needed is a Phillips head screwdriver. You will simply flip the switch and a red LED will light. You will now be able to write to side two of any disk. Flip the switch back and normal operation will resume.

This device will Double your disk storage space enabling you to store data on side "2" of your disks. This device is fully assembled and tested with easy-to-install instructions included.

Coming soon for all drives!!!!!!!!!!

All this for the
LOW LOW price of ONLY **\$24.⁹⁵**
+ 2.50 shipping
(Specify 810 or 1050 Drive when ordering)

DUPLICATING TECHNOLOGIES INC.

CASSETTE DUPLICATOR

If you only have a tape recorder and **no** disk drive, this program is for you!!!

With this powerful program you can make back up copies of 99% of all tapes, even multistage boots like Zaxxon. We have made working back ups of every cassette we could find. Single and multistage are no problem. Even multistage basic can be duplicated.

You will want to be able to back up your valuable tape collection. Original tapes will stretch with continued usage and become useless.

One cassette for the
LOW LOW price of ONLY **\$14.⁹⁵**
+ 2.50 shipping

SUPER TRANSLATOR

PLEASE BACK UP OUR DISK BEFORE USING

SCOPE

As you have probably found out by now some software will not run on the new 800XL. Up to 40% of all software is not compatible with the Atari XL's yet all of this software will run on the old 800 and 400 computers. This is a definite problem. The reason is that Atari changed the operating system (ROM) in the XL's. Most new software manufacturer's are now producing their software to run on the new XL operating system. In time all software in the future will work but this change over will take some time.

SOLUTION

Atari sells a Translator disk to compensate for this problem. What with their Translator disk they believed or attempted to solve the problem in this way. When you load in their Translator Disk you are loading in the whole operating system from the old Atari 800 which attempts to replace your operating system. Very clever and funny in a way. You buy a new computer and load in the operating system from an old computer.

PROBLEM

This Atari Translator works but still there is software that won't load and it has become difficult to get this Atari Translator due to the problems and takeover of Atari.

Our Super Translator Disk will run some programs that the Atari Translator will not. So if you have no Translator Disk at all our disk will be a tremendous aid to you. If you have the Atari Translator ours will still help you. Even with theirs and ours you will find a few programs that won't run. Fortunately they are **very few**. You should be able to run 40% more software with our Super Translator.

Is Compatible With All **XE** Series Computers

99 Jericho Tpke. • Suite 302A • Jericho, New York 11735 • (516)333-5805, 07, 08

The 1050 Duplicator is here...

THE DUPLICATOR FOR THE 1050 & 810 ATARI DISC DRIVES IS FINALLY HERE

It has taken us two years to develop this ultimate disk backup and drive enhancement device.

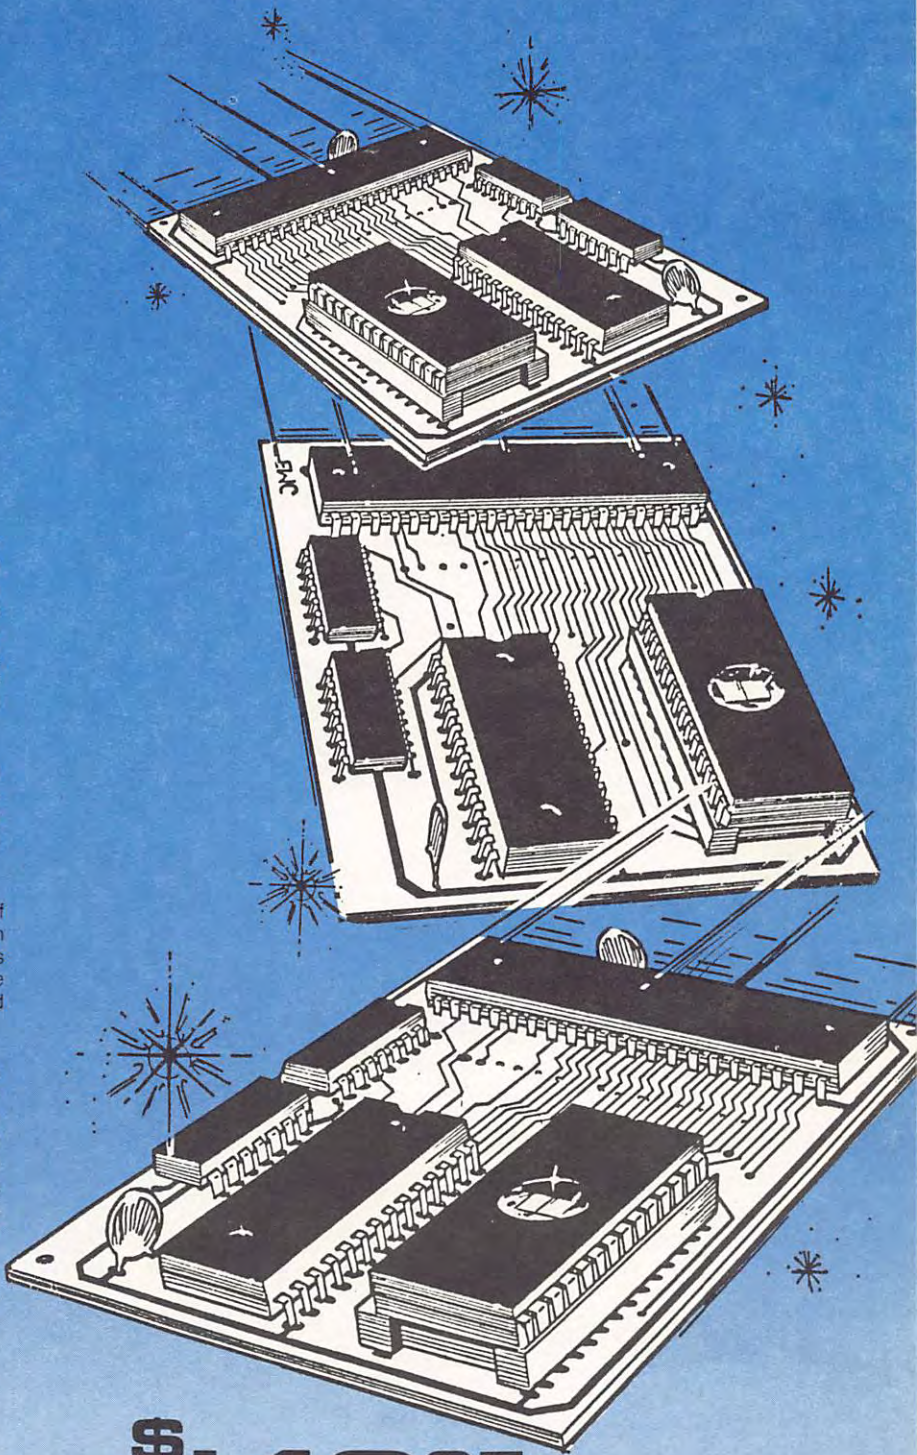

The Duplicator is a sophisticated hardware device based on the powerful 6502 Micro Processor. The P.C. Board simply plugs into your disk drive. A Phillips screwdriver and about five minutes of your time is all that is needed. Every Duplicator is thoroughly tested and must pass high quality-control specifications before shipping.

WHAT WILL IT DO?

1. You will be able to copy just about any disk. The copies you make will run on any Atari drive. The Duplicator need not be present to run your backup copies. The Duplicator is fully automatic. You need only insert source and destination disks. Custom formats will be read and in turn reproduced on the backup copy disk. Our device will reproduce any custom format or heavily copy guarded scheme, bad sectors, double sectors, 19 through 24 sector format will present no problem to the Duplicator. The main purpose of the Duplicator is to copy disks!
2. When you have a Duplicator installed in a 1050 drive that drive will be turned into true double density. You will have twice the disk storage. Your drive will be compatible with other double density drives such as The Rana Indus, Percom, etc. You will still have single and double density.
3. High speed read & write. Your disk drive will ready and load all of your software many times faster, thus, saving wear and tear on your drive. The 810 and 1050 drives read one sector at a time. This is slow and inefficient. With the duplicator installed you will be able to read eighteen sectors in the time it takes standard, unenhanced drives to read one.
4. Included with every Duplicator will be user friendly disk software. A simple, menu driven program will allow you to copy all of your software. A Duplicator enhanced drive will be a SMART drive. We plan to write many new and exciting programs that can only be run on an enhanced drive, eg. sending a copy-guarded disk over the phone. Since the drive is now fully programmable, future upgrades can be made available to you on disks, should the need arise. No further hardware changes will ever be needed. The Duplicator comes with a full hardware and software guarantee.

NO HARM TO YOUR DRIVE OR INCOMPATIBILITY PROBLEMS CAN EVER ARISE AS A RESULT OF THE INSTALLATION OF OUR DUPLICATOR.

The **DUPLICATOR** package will include: The **DUPLICATOR** P.C. Board with simple installation instructions, and all the necessary software and operating instructions. We expect the response to this new product to be overwhelming, so order now before our **DUPLICATOR** advertising appears this fall in the trade magazines.

\$149⁹⁵
The one & only **DUPLICATOR™** for the **LOW** Price of
Specify the 810 or 1050 when ordering.
Plus \$3.50 for shipping and handling.

EPROM BURNER PLUS 32K CARTRIDGE COPIER & CREATOR

At last a sophisticated **EPROM BURNER**. Duplitech's **EPROM BURNER** will make 8k, 16k, and some* 32k bankselected cartridges by OSS. We believe this is the first device ever to duplicate basic XL for the Atari.

The **EPROM BURNER** will be shipped with two blank cartridge boards. One is for 16k and the other for bank selected cartridges. We also sell extra blank boards if needed. This **EPROM BURNER** will program 2716, 2732, 2732A, 2764, 27128 and many other popular EPROMS.

*Some
Includes:
OSS Action
MAC 65
Basic XL
and many
others.

SCOPE:

This **EPROM BURNER** is an advanced prom programmer with many features not available on comparable burners costing thousands of dollars. It can program an EPROM quickly and efficiently. A 2716 takes approximately 12 seconds to make. This is a tremendous technological improvement over the 90 seconds most regular programmers take. We also feel that this programmer integrates successfully into the Atari system better than **any EPROM BURNER** on the market today.

The device name for our programmer is "B:" and you can write your own custom programs in Basic or Action to create your own software or hardware systems.

BEST of all, you can just use a copy function in your DOS to read and program Proms, without any special program (other than the device handler).

This is a sophisticated device designed especially for hardware developers and user groups.

All for the

LOW LOW price of ONLY **\$249.⁹⁵**

CART CLONE

Dealer Information

CART CLONE is simply the **best** cartridge copying system available anywhere for any price. Let us prove it.

Check out these features:

CART CLONE works with all Atari 400/800 and XL series computers with no "translator" disk needed. The powerful **CLONER** software is available in disk or cassette versions.

CART CLONE comes with a **LIFETIME** guarantee against hardware and software media failure.

The **CART CLONE** package includes an easy to use autorun menu (disk version) for the ultimate in convenience.

There's more . . .

Your **CART CLONE** files are **TOTALLY DOS COMPATIBLE!** They can be run from ours or any other menu, or right from DOS. They can be copied, moved, deleted and sent via modem. **No other cartridge copying product gives you that!**

The **CART CLONE** cartridge features an exclusive LED status indicator. It lets you know your **CART CLONE** is inserted properly and functioning normally. **No other cartridge copying product gives you that!**

CART CLONE is built from the highest quality MILITARY SPEC components for the utmost in reliability. **No other cartridge copying product gives you that!**

CART CLONE — simply the **best** cartridge copying system

What is CART CLONE?

CART CLONE is an easy to use cartridge backup system for the ATARI 400/800 and XL series home computers. The package consists of the CLONER software and the CART CLONE cartridge itself. The user first boots up the CLONER program, then inserts the cartridge he or she wishes to copy. That's it! The software does the rest. To run the cartridge, the user inserts CART CLONE into the cartridge slot, and boots up the disk he or she has created. When ready, the user turns on the CART CLONE, and the cartridge runs perfectly! Any 8K or 16K cartridge can be copied this easily using CART CLONE. Gardner Computing guarantees it.

CART CLONE Dealer Prices

Not only is CART CLONE the best cartridge copier around, it's the most affordable. We do all our own design, manufacturing and marketing so that we can provide the highest quality product for the lowest cost.
