us games plugs into

the all family market.

New market means new money.

U.S. Games is a unique video game manufacturer committed to innovation in every aspect of the business. Creating not only new games for you, but new customers for you, by identifying a high potential target market just waiting to be converted into your sales dollars!

The target? The family...the entire family. Not just the teenage boy segment accounting for 2 billion dollars in video games sales ... but moms, dads, little sisters, too. The family whose numbers exceed 60 million — that's 3 times the number of families with teen boys... promising a potential of 6 billion dollars in video games sales for you, the video game

Video games for mom and sis? You bet!

U.S. Games feels so confident about the potential of the all-family market that it's created a full line of fun-filled, action-packed games just for it—The Family Action Series. All as much fun to watch as they are to play...and all geared toward bringing the family together.

But because U.S. Games believes all-family means adventure games, too, it also announces its Action-Adventure Series. Exciting, unique games to expand your teen market... to entice the entire family.

Enhancing these games? Innovative promotions like a money-back guarantee, a \$50,000 sweep-stakes, and highly visible T.V., magazine, and co-op advertising.

It starts with marketing and research savvy.

What makes U.S. Games feel so confident about its new target market, its new games, its new advertising and promotions? Simply the extensive research and the marketing expertise of the family it belongs to — The Quaker Oats Company. A worldwide organization doing business to the

tune of 3 billion dollars a year, with products appealing to both adults **and** children.

Take Fisher-Price Toys. Quaker's marketing expertise helped to increase Fisher-Price's sales by 350 million dollars in just 12 years after it was acquired. That's a 700% increase!

Obviously, it is this kind of marketing knowledge that promises to make U.S. Games' all-family market a success.

And for the future?

As for the future of U.S. Games, hold on to your joystick! This spring U.S. Games offers a uniquely designed expanded memory device employing both ROM and RAM... creating cartridges that'll generate spectacular new variations and complexities. Plus, advanced controllers with proportional joysticks for added functions with this new software.

your kind of company.

U.S. Games is a believer in innovation. Innovation in target markets, in marketing, in games, in advertising, in promotions, in technology... Innovation. Making U.S. Games the unique video game manufacturer for you to go with ... and grow with.

Video games? Oh, I used to think they were all alike. You know...a lot of, as my kids say, zapping out this and zinging into that. The kind of stuff a mother like me really isn't all that interested in.. or understands...or for that matter could ever get a chance to play. Ah ha...my son actually used to hide video cartridges so "the girls" wouldn't get too good. Believe me...it worked.

Well, anyway, thumbing through **NEWSWEEK** the other day, I happened to see an ad for something called the Family Action Series. Imagine! Video games in my kind of magazine! U.S. Games games.

Well, I have to admit, they did look kind of fun, and I thought, what the heck, I have nothing to lose. The ad said if I didn't like the game, U.S. Games would buy it back. Nice.

So, I got one of the cartridges home...and guess what? I loved it! The whole family loved it! Even the older kids. Now I'm the one hiding it from them.

Believe me when I say U.S. Games' new Family-Action Series is the best thing that ever happened to video games. U.S. Games has actually come up with an idea that's going to bring families together...instead of splitting them up...

And I think that's a terrific breakthrough!

Piece'O Cake! It puts the frosting on video games!

Baking? A piece of cake? Well, let's just say it's not as easy as pie! At least not for the player of this game. It's one that'll really get him cookin'...stacking up points for every layer of cake he plops on a platter... then tops with a cherry before they splatter on the production line.

The better the baker, the faster that line moves ... until he can't stand the heat and gets out of the kitchen.

Video games? I love 'em. All my friends, too. Buying 'em all the time...or gettin' our moms to. Had a problem for a while though...lot of the stuff seemed the same. And we wanted somethin' different.

Then, Jimmy, he's my best friend, he found a whole bunch of neat games at this

one store he went to. U.S. Games games. Called 'em the Action-Adventure Series! And wow! I can see why... non-stop excitement! I mean, we're always playing 'em... and always findin' 'em fun! And really different!

My favorite one now?

M*A*D — Missile Attack and

battle head to head with
Jimmy...course, then one of
us is always gettin' mad 'cause

play it!

It's the same with all the U.S. Games games. We play 'em and play 'em and play 'em and then we come back and play 'em some more. 'Cause they're not the same old stuff.

Video games? You bet I love 'em...especially if they're U.S. Games games!

Gotta go! Jimmy's pluggin' one in now!
