8-Bit Editor	Bob Woolley	(510)865-1672
--------------	-------------	---------------

You may reprint uncopyrighted SLCC Journal articles in any non-commercial form, provided excessive praise is given the author and the SLCC. However, what is written within may be PBS.

## No minutes just Stuff!

The April meeting must have been very boring. Usually when I miss a meeting, my cheap assistant (Robbie Bridges) sends me some notes so I can fake the minutes. This month nothing, maybe the new roommate he has acquired, George or was it Ralph, has been keeping him occupied. That's OK, probably nothing much happened anyway.

The only thing of interest at the May meeting will be the annual election of Officers. This important event is always very exciting. (On a par with watching my cat sleep on the top of the TV.)

The good things that have happened in the computer world this month probably have to do with the Appeals court overruling the judge's decision on Windows 98. It seems to me that a judge should know the difference between a computer and a garbage disposal before he is allowed to make such stupid decisions. Nope, that's probably asking too much. Rumor has it that Willie Gates is going to loan \$150 million to Sun and Electronic Arts, I bet that would shut down a lot of self serving noise.

Speaking of my good friend Willie, he sent me a personal invitation to attend the Windows 98 rollout on June 25<sup>th</sup>. Well almost personal, Email is personal, isn't it? You can bet I will attend, where else can you get free food, free tee shirt and a chance to win a commemorate copy of Windows 98, all for listening to a sales pitch. That is even better than sitting through time-share condominium sales pitches.

Intel doesn't want to be outdone and let Microsoft get all the attention so in the next 3 months they will be making several releases of new chips. The Pentium II will go to 450 MHz. In addition, a new chip designated for server work only running a full speed cache, rather than 1/2 speed that the Pentium uses, is scheduled to be released at \$4500 a copy. If you are interested in one of these chips see Bob Woolley, he will either get you a chip or give you a cold, and you can guess which one is most likely.

See you at the meeting. **Jim Moran – Secretary.**

## NEW MEETING LOCATION

The SLCC has been meeting in the San Leandro Library for the last 14 years or so. Sadly, the Library is closing for seismic re-construction and we must find a new location to hold our meetings (this should not be big news to you all....) To our good fortune, Millie Lepley has offered the St. Leander School facility as an alternative for the club meeting.

St. Leander is just three blocks west (towards 1880) of the Library, on the south side of Davis street. Park in the playground at the rear of the school and use the entrance located there.

See ya there!!

## This Month

We are going to have an 8-bit blow-out this month! A complete system will be practically given away in the Crooked Raffle...

130XE

XF551

1050

Magnavox RGB Color Monitor

EPSON FX-850 w/interface

Touch Tablet

XJ500 Joystick

And a ton of software

AtariWriter

ED/ASM

ACTION!

DiskWiz

Chameleon 80 col s/w

And on and on....
